Chapter 1

ASP

1.1 The secret node!

Wow... you found the secret node!

You really like pressing buttons, don't you? Even if you don't know what they do? You're lucky that your harddrive didn't get formatted...

1.2 ASP version 1.0

ASP version 1.0
30-08-95

ASP is a program to scan various OS lists and information
©1995-1996 Zeno Montresor

What does it do ?
How do I use it?
Next Release
How to reach me

1.3 What does it do?

ASP is a very intuitive scan program.

ASP is designed for coder and hacker, it permit to investigate all information about task, libraries, port, resource, expansion board, monitor, memory and much more.

Every window is a graphics representation of one or more important structures. If you don't remeber the most important structure like Screen, Window, MsgPort, Semaphore, Libraries, Resource, ecc, the OS Include files are very useful to comprise the information that ASP visualize.

1.4 What ????

If you are not able to use ASP, please buy another machine, like a IBM clone (IBM stand for Idiotic Bullshit Machine)

ASP use MUI and it is very intuitive to use.

1.5 ASP 2.0

ASP 2.0 will be the ultimate AMIGA MONITOR

- Disassembler
 - More structure
 - Save Window and screen as ilbm
 - more parameter
 - ecc

1.6 How to reach me

If you have anything to tell me (bugs, suggestions, ideas 8-), send it to:

Zeno Montresor
Via Montorio 65
37131 Verona Italy

Phone +39-45-532190

worthless thing, bomb, and other unhealthy stuff may be send to NIL: or /dev/null or whatever it is called on your system.

Currently I'm a student and can be reached at:

zeno@juliet.dsi.univr.it

or

netwar@romeo.dsi.univr.it

Please use the second only if the first is not available.
