PGS.MAN

1.1 Manual Errata

Manual Errata

Page Explanation

 58: Step 3: Note that the text will remain highlighted after importing.
     Click in the text to deselect it.
 68: The grid commands are in the View menu, not Layout.
120: The description for gadget A refers to gadget E; it should refer to
D.
162: The frameless text examples have an overset indicator which should
not
     be there.
171: The filter list omits ProWrite.tfilter which is used to import text
     from New Horizons' ProWrite.
219: The Illustrator filter will not ignore charts and graphs as stated in
     the list; they will be imported as drawings.
246: Para 1: Change 'Edit tool' to 'Object tool'.
262: The first Flash Macro sidebar is incorrect. Change 'DuplicateTo-
     Page.rexx' to 'RotateAboutPoint.rexx'. The last word of the sidebar,
     'PageStream', was cut off.
301: Canon: For some Canon printers, including the BJC-600, you must
choose
     the Epson driver. Choose Epson from the Type popup and see if your
     printer is listed before choosing Canon.
301: Primera: This driver can be used with or without the dye sublimation
     option. The driver name (as listed in the Type popup gadget) is
Fargo,
     not Primera. Choose Primera or Primera Pro from the Model popup. This
     driver has extra options specific to these printers.
303: Step 3: Change 'page 105' to 'page 305'.
383: Last para: PageLiner copies text to the clipboard in IFF FTXT format
     only, not IFF FTXT and IFF DTXT.
387: Show Invisibles para: Change 'Settings/Options' to
'Settings/General'.
388: Path Preferences requester: The screenshot is wrong. There is just
     one path for dictionaries, instead of path and filenames for the
     individual dictionaries.
404: Conditional Break, Para 2: Choosing the Conditional Break command

```
will
      toggle conditional break, not automatic kerning.
484: Para 1: Change '75x75 dpi' to '65x70 dpi' for PAL.
485: Set Grid: This command is in the View menu, not the Layout menu.
486: Set Guides: This command is in the View menu, not the Layout menu.
495: Style Palette, Para 1: Change 'Macro palette' to 'Style palette'.
527: The shortcuts for Send to Back and Send Backward are reversed.

Appendix A: Special Characters
00173: Macron:          should be 00175
00222: thorn:           should be Thorn
00254: Thorn:           should be thorn
00254: y dieresis (ÿ): should be 00255 (Two 00254 entries were listed.)
00255: z caron:         should be 00382
00337: oe ligature:     should be 00339
00352: S caron:         Ctrl C code is SV
```
