

# AppleCD Multimedia Kit for Macintosh

## Features

### AppleCD 300 external CD-ROM drive

- Double-speed (300 KB/sec), 295 ms access
- Lets you read multisession Kodak Photo CDs and play standard audio CDs
- Is compatible with industry-standard ISO 9660/High Sierra file formats and Macintosh HFS

### AppleDesign Powered Speakers

- Personal, near-field listening
- High-quality stereo separation and sound
- Excellent frequency response using transducer, tuned-port design, and active equalization
- Built-in noise circuitry for clear sound
- Magnetically shielded

### CD-ROM titles

- Apple Multimedia Starter CD
- Compton's Multimedia Encyclopedia
- Your choice of up to 3 free CD titles from a selection of 30 top CD titles

The high-performance AppleCD Multimedia Kit for Macintosh computers offers all the components you need to advance your Macintosh into the CD-ROM and multimedia revolution. This multimedia kit gives you access to the wealth of business resources, educational programs, reference libraries, software, databases, clip art, and games available on CD-ROM. It comes complete with an AppleCD 300 external CD-ROM drive, AppleDesign Powered Speakers, all necessary cables and software, and up to five CD-ROM titles.

The AppleCD 300 external CD-ROM drive spins at twice the speed of ordinary CD-ROM drives to give you faster access to the tremendous amount of information stored on CD-ROM discs and to provide smoother playback of your QuickTime movies, videos, and animation. The AppleCD 300 also lets you read multisession Kodak Photo CD discs and play standard audio CDs. You can cut and paste music, sound, animation, photographs, and even movies into your favorite word-processing, presentation, and graphics applications.

AppleDesign Powered Speakers equip your computer with CD-quality, near-field stereo output. Using controlled sound dispersion, they provide excellent stereo separation and sound quality while maintaining a private listening environment. The transducer, tuned-port design, and active equalization allow the speakers to be small and yet offer excellent frequency response. Their built-in noise-reduction circuitry provides clear sound, and each speaker is magnetically shielded for use near computer displays and peripheral devices.

The Apple Multimedia Starter CD takes the user on an interactive exploration of CD-ROM and multimedia including samples from around the world of education, business, and home uses for multimedia and "galleries" of clip art, photos, QuickTime movies, sound/music and more.

Each kit includes Compton's Multimedia Encyclopedia, Apple Multimedia Starter CD, and your choice of additional free CD-ROM titles from a menu of over 30 titles carefully selected for value and quality.

## Technical Specifications

### AppleCD 300 external drive

#### Performance

- Double-speed (300 KB/sec) data transfer rate
- 256KB buffer for faster data transfer
- Average access time of 295 ms

#### Compatibility

- Fully compatible with Macintosh operating system software, including System 7 and QuickTime software
- Compatible with ISO 9660 including High Sierra format and Macintosh HFS
- Supports multiple CD-ROM formats, including CD-ROM XA, multisession Photo CD, CD+G, and CD+MIDI
- Plays standard audio CDs
- Supports CD digital audio data via SCSI

#### Reliability

- Automatic lens cleaning and double front-loading door for better dust protection

### AppleDesign Powered Speakers

#### Audio quality

- Tuned-port bass-reflex system for extended low-frequency response
- Active equalization for best frequency response at all listening levels
- Focused sonic dispersion to optimize output for personal, near-field listening
- Noise-reduction circuitry for audio clarity

#### Computer connectivity and use

- Dual-input mixer for computer- and CD-generated sound
- Magnetic shielding to avoid image distortion on computer displays
- Small, sleek design to fit on a desk
- Compatible with virtually any personal computer or electronic device with stereo audio line out player, or any television supporting sound output
- Built-in dual-channel amplifier
- Power, volume, and balance controls conveniently located on the front panel
- Headphone jack to provide privacy

#### System requirements

- Any Apple Macintosh or Macintosh Performa computer with a 68020 (with PMMU) microprocessor or greater
- At least 4MB of RAM (5MB or more recommended)
- A color display with 640 x 480 pixel resolution or greater
- Macintosh system software version 6.0.7 or later, or Macintosh Performa system software

## Kit Contents

- AppleCD 300 drive and caddy
- Power cord, SCSI system cable, and terminator
- AppleDesign Powered Speakers
- Powered speaker and satellite speaker
- Power-supply module (120-V input)
- Computer-to-speaker cable (with 3.5-mm miniplugs)
- CD stereo cable with RCA jacks
- Speaker-to-speaker cable
- Compton's Multimedia Encyclopedia
- Apple Multimedia Starter CD
- CD-ROM titles brochure
- Complete instructional documentation for setup and reference
