# Chinese Language Kit

The Apple Chinese Language Kit contains everything you need to easily include Chinese text in your letters, presentations, and reports.

Whether you're a desktop publisher or business professional, you can use this Language Kit to develop Chinese-language materials such as brochures, posters, business cards, and presentations. Students and teachers can use it to run interactive Chinese-language programs and produce compelling papers in Chinese. Although the Chinese Language Kit does not translate text, it does let you easily input, edit, and print in Chinese.
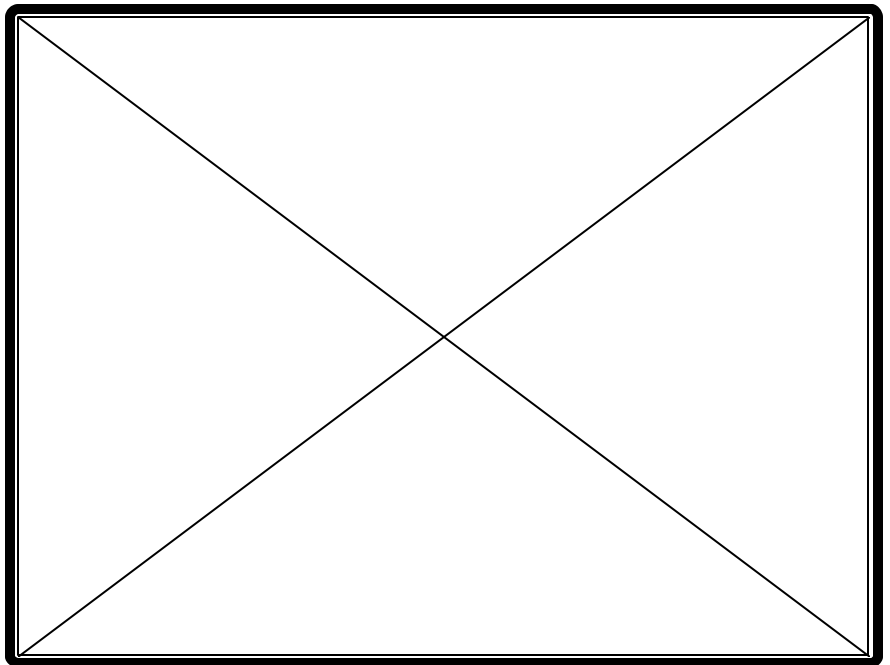

Many major software programs, such as WordPerfect and Nisus, take advantage of WorldScript, Apple's new software technology. These programs allow you to input, edit, and format Chinese text right along side other languages in your document. The Chinese Language Kit also allows you to run applications that have been localized for Chinese speaking countries.

The Chinese Language Kit contains Simplified and Traditional characters, as well as a wide choice of input methods.

The Kit also comes with TrueType fonts, which produce high-quality output from any Macintosh-compatible printer. Documentation is provided in both Chinese and English, making the Language Kit easy to use whether you're a native speaker or just learning Chinese.

Because the Language Kit works as an extension to System 7.1 and uses the operating system you already have, there is no need to store an additional system on your hard disk. All you need is the Chinese Language Kit, System 7.1, and a compatible application.

## Features

**Solutions**
- Create documents and presentations in both Chinese and English, or Chinese and other languages supported by your system
- Produce promotional materials, foreign language textbooks, bilingual educational materials, and more
- Insert Chinese text into letters, presentations, spreadsheets, and other documents
- Boost language learning by using interactive practice drills and other learning tools

**Ease of use**
- Offers fast, simple installation
- Enables you to easily create, edit, and print Chinese characters
- Provides documentation in Chinese and English

**Compatibility**
- Runs WorldScript applications including WordPerfect and Nisus, or localized applications such as ClarisWorks Chinese and TurboWriter
- Recommended for all QuickDraw printers; also works with PostScript compatible printers

**Flexibility**
- Comes with TrueType fonts: LiSung for Traditional and Song for Simplified
- Includes four additional fonts on the compact disk
- Allows you to use Simplified Chinese characters, Traditional characters, or both
- Provides a choice of input methods: Pinyin, Zhuyin, Cangjie, and others

Outside the U.S., Order No. M1648Z/A

## Technical Specifications

**Chinese Localized Applications**
- The Chinese Language Kit can be used with a variety of Chinese-localized applications. They include:
— Canvas 3.5 Chinese, from Deneba
— ClarisWorks 1.0 Chinese (Simplified), from Claris
— ClarisWorks 1.0 Chinese (Traditional), from Claris
— FileMaker Pro 1.0 Chinese (Traditional), from Claris
— Imprint 1.35 Chinese, from Ivy Systems
— Lotus 1-2-3 Chinese, from Lotus
— NewsMaker Chinese, from Compose
— Nisus 3.50 Chinese (Simplified), from Nisus
— Nisus 3.50 Chinese (Traditional), from Nisus
— PageMaker 3.0 Chinese (Simplified), from Aldus
— PageMaker 3.5 Chinese (Traditional), from Aldus
— TurboWriter 2.0.5 Chinese (Traditional), from Transpac
— WordPerfect 2.2 Chinese (Simplified), from WordPerfect

**WorldScript-savvy (2-byte) Applications**
- The Chinese Language Kit can be used with many programs that employ Apple WorldScript software technology. These programs include:
— AllPage 1.82, from MicroMacro
— AllScript 1.81, from MicroMacro
— FreeHand 3.1 Asian, from Aldus
— Imprint 3.5, from Ivy Systems
— In Control 2.0, from Attain
— Nisus 3.482, from Nisus
— Persuasion 2.1 Asian, from Aldus
— Sindex 2.0, from WinSoft
— StatView 4.01, from Abacus Concepts
— WinFile 1.7, from WinSoft
— WinText 2.7.1, from WinSoft
— WinView 1.7, from WinSoft
— WordPerfect 2.1.4, from WordPerfect

Note: Apple has tested only a limited number of applications; these lists are not intended to be comprehensive. Many nonlocalized applications that do not employ WorldScript software technology may provide limited functionality and allow input of Chinese characters.

**Printers supported**
- Recommended: QuickDraw printers, including the Apple StyleWriter line and the ImageWriter line
- PostScript-compatible printers, including Personal LaserWriter NTR printers and other LaserWriter printers (although PostScript printers can produce Chinese characters, performance may vary)

**Requirements**
- Apple Macintosh computer with at least 5MB of RAM
- Hard disk with at least 10MB of space available (17MB required to install both Simplified and Traditional characters)
- Apple SuperDrive floppy disk drive
- Macintosh system software version 7.1 or later
- An application that supports WorldScript or that has been localized for Chinese

## Sample Fonts

TrueType outlines can be displayed and printed in any type size or shape without distortion.

**Song (Simplified)**

**Apple LiSung Light (Traditional)**
