

## *Atmospheric Ozone Depletion Quick Start*

- Print out this page.
- Copy the file "Ozone Depletion" in this folder to your hard disk.
- Open the file "Ozone Depletion".

**Question 1:** Has there been depletion over the Antarctic in October, the Antarctic Spring?

- Choose "October" from the **Y-axis** menu
- Choose "Antarctica USA Amundsen-Scott" from the **Items** menu
- Click on data points to show depletion
- Choose "Antarctica Japan Stowa" from the **Items** menu (more ozone than the U.S. station because it is further north and of lower elevation)
- Click on data points to show depletion.

**Question 2:** Has there been depletion over the Antarctic in November?

- Choose "Duplicate" from the **Discovery** menu
- Choose "November" from the **Y-axis** menu
- Click on data points to show depletion
- Choose "Tile Windows" from the **Discovery** menu to show both investigations simultaneously.

**Question 3:** Has there been depletion over the USA in March, the Northern Hemisphere Spring?

- Choose "New Graph Window" from the **Discovery** menu
- Choose "March" from the **Y-Axis** menu
- Choose "USA Bismarck" from the Items menu
- Choose "USA Boulder" from the Items menu
- Choose "Re-Scale..." from the **Discovery** menu
  - Press the **Tab** key
  - Enter "350" from the keyboard
  - Click "OK" with the mouse
- Click on data points to show depletion.

**Question 4:** Has there been depletion over the USA in April

- Choose "Duplicate" from the **Discovery** menu
- Choose "April" from the **Y-Axis** menu
- Choose "Re-Scale..." from the **Discovery** menu
  - Press the **Tab** key
  - Enter "340" from the keyboard
  - Click "OK" with the mouse
- Click on data points to show depletion.

**End:** • Choose "Tile Windows" from the **Discovery** menu to show all four investigations

- Choose "Quit" from the **File** menu.
