# How To Get Customer Service

## ***Product Support Policy***

Your purchase of an Expert product includes free product support to help you get the most out of your software. All Expert products are thoroughly tested and come with a user's guide and/or help file. In most cases, the answer to many of your questions are in this help file.

If you are having problems starting or running the program, please feel free to give us a call. We can be reached at **(305) 567-9996**, Monday through Friday, 9:00AM to 5:00PM EST (Eastern Standard Time).

When you call, you should be at your computer. Be ready to give the Product Support Specialist the 10-digit program version number from the back of the CD jewel case, as well as the following information:

- The version of DOS that is installed on your computer. (You can determine the version by typing VER at the DOS prompt.)
- The version of Windows® or MacOS® installed on your computer.
- The type of hardware you are using:
  - 1 The brand of computer you own,
  - 2 CPU type (80386, 80486, Pentium, 68030, PowerPC, etc),
  - 3 Video type
- The exact wording of any messages that appeared on the screen.
- What happened and what you were doing when the problem occurred.
- We encourage Windows® (or MS-DOS 6.x) users who need product support to print an MSD report. Have it available for the Product Support Specialist who answers your call. You will find the MSD (Microsoft Diagnostics) program in either the Windows or the DOS directory.
