

Object of the game

Line up a valid "hand" of rats to make them exit through the door at the bottom of the screen. When the number of rats listed on the exit counter reaches zero, you move to the next level. The patterns of rats on the right side of the screen show the combinations of rats that can exit. The more complex the "hand," the more points you earn. The game ends when no more rats can enter the game field.

**Level**

The level you are playing.

Score

Your current score.

Inactive trap

An inactive trap. Use **TAB** to make it active. To be made active, a trap must have an arm pointing at it.

Hands

These are the valid "hands" and their point values. The hands can be made with any color of rat.

Active trap

An active trap. This trap is ready to trap rats.

Trapped rat

A trapped rat waiting to be added to a "hand." Use **SPACEBAR** to trap and release rats.

Platform

The platform where rats line up to exit. If you have a "hand" that matches one of the valid hands on the right side of the screen, those rats will exit here.

Arrow

Rats begin to line up here to form hands.

Arms

These arms move captured rats between traps. Use the **ARROW KEYS** to move the arms. (On some levels, the arms don't move.)

Exit counter

Shows how many more rats must exit before you can move to the next level.

How to play

- Trap and release rats to change their order. Just press **SPACEBAR**.
- Arrange rats in patterns -- or "hands" -- like those on the right side of the game screen to make them exit and to earn points. For example, on Level 1, when you line up 3 rats of the same color, you earn 5 points when they exit.
- A trapped rat can be swapped with a passing rat.
- On certain levels, you can use the arms in the middle of the screen to move rats between traps. Press the **LEFT** and **RIGHT ARROW KEYS** to swing the arms. On other levels, the arms don't move.
- Sometimes you can change the active trap. Just press **TAB**.
- When a valid "hand" reaches the bottom platform, the rats exit. You move to the next level when the exit counter reaches zero.
- The game is over when when no more rats can enter the playing field.

Tips and strategies

- Be patient. Wait until there are several rats on the ladders before you start creating hands.
- Create same-color pairs as often as possible to use as building blocks.
- Use the white rats as wildcards.
- Use rats carrying plus signs (+) to double the value of a hand.
- Avoid rats carrying minus signs (-). They halve the value of a hand.
- Avoid gray rats unless you are collecting them for a hand. A single gray rat prevents the next 3 rats from exiting.
- Rainbow hands can start with any color, but they must still follow the order shown on the game screen. For example, if you started a rainbow hand with a yellow rat, the order would be yellow, green, light blue, dark blue, pink, red, orange.
- **UP ARROW KEY = SPACEBAR; DOWN ARROW KEY = TAB**
- There are 20 levels in Rat Poker. You can change the start level instead of playing from the beginning. The following things change from level to level: the number and arrangement of traps, the types of available hands, and the types of rats.

Scoring

You earn points when a certain combination of rats -- a "hand" -- exits the playing field. Below is a list of possible hands. Not all hands are valid on every level.

5 red rats	5
5 orange rats	25
5 yellow rats	125
5 green rats	150
5 blue rats	400
5 dark blue rats	500
5 purple rats	600
5 red rats	1500
5 orange rats	2500

- Use rats carrying plus signs (+) to double the points of a hand.
- Avoid rats carrying minus signs (-) because they halve points of a hand.

Note Rainbow hands can start with any color, but they must still follow the order shown here. For example, if you started a rainbow hand with a yellow rat, the order would be yellow, green, light blue, dark blue, purple, red, orange.

Game options

You can customize game options by increasing the game's difficulty, changing the start level, changing the default name that appears in the **High Scores** list, and turning the background music and sound effects on or off. You can also have the game ask for your name each time you earn a high score, reset the high scores, and turn Quick Help and Quick Tips on or off.

Special features on each level

Each level starts with a tip for that level.

Level 1:

Use **SPACEBAR** to trap rats.

Level 2:

Use the **LEFT** and **RIGHT ARROW KEYS** to switch between traps.

Level 3:

You can trap two rats at a time -- use **TAB** to switch between the two traps.

Level 4:

Use **TAB** to change the active trap. Use the **LEFT** and **RIGHT ARROW KEYS** to swing the arms.

Level 5:

New hand! 5 rats of the same color.

Level 6:

Some rats now have plus (+) and minus (-) signs. A plus sign doubles the points for the hand and a minus sign gives you half the points.

Level 7:

New hand! Two sets of 3 in a row.

Level 8:

White rats are wild! You can use them for any color rat.

Level 9:

On this level, there are 3 traps and 3 arms. Press **TAB** to change the active trap.

Level 10:

The rats are moving faster! Can you keep up?

Level 11:

New hand! A rainbow of 6 different colors in the right order will boost your score.

Level 12:

4 of a kind is not allowed.

Level 13:

New hand! A hand of 4 of a kind plus 3 of a kind. Watch out -- a single gray rat prevents the next 3 rats from exiting.

Level 14:

A pinwheel of four arms lets you move rats among the traps.

Level 15:

The challenge gets harder as 4 of a kind and 5 of a kind aren't allowed.

Level 16:

4 of a kind and 5 of a kind are back in the game!

Level 17:

New hands! 7 of a kind and a rainbow of 7 different colors.

Level 18:

No rainbow hands allowed.

Level 19:

The pinwheel is back and all hands are in the game!

Level 20:

Rescue 99 rats to win this level.
