# Things you can DO on the Internet
The Concise 1DO3 Directory

1DO3

All you want to do, without all the to-do

Our pledge to you If what you want to do is listed here we guarantee that within 3 clicks or less you can be at a relevant, carefully researched website that will help you to achieve your objectives

Things you can DO on the Internet

Table of Contents

Introduction

Welcome to 'Things you can DO on the Internet'.

At 1DO3, we believe that there's still no faster browser than a pair of human eyes! With the 1DO3 Directories you can find out in moments whether the web can help you to get things done, without even switching on your PC or connecting to the Internet.

There are two versions of the 1DO3 Directory: **Concise**, and **Full** – both of which come on the 1DO3 Offline Member's CD.

- **The Concise** shows how we've categorised the websites that are listed for each task or action. It's one thing to want to 'Find a map' to get directions to a friend's new house, but you might want to know if we cover Star charts, Historical maps, or even How to read a map. We do - and it is the Shorter Directory that will give you this additional information.

- **The Full** 1DO3 Directory also lists the websites that our researchers have included under each task or action. *Please note that these lists may change on the 1DO3 website as they are constantly being reviewed and updated.*

We make this pledge: **"If what you want to do is listed in this 1DO3 Directory we guarantee that within 3 clicks or less you can be at a relevant, carefully researched website that will help you to achieve your objectives."**

If you use the 1DO3 directory in conjunction with 1DO3 Offline (from the CD on which this directory was published), you can also get to a useful website in as little as 10 seconds - though alas we cannot guarantee that the websites we link you to will perform so quickly.

We now live, for better or worse, in a wired world, where the Internet is just part of the infrastructure. It is time that the web became simpler, quicker and above all more useful in our daily lives. The 1DO3 suite, of directories, CD and website, is a significant development in this direction.
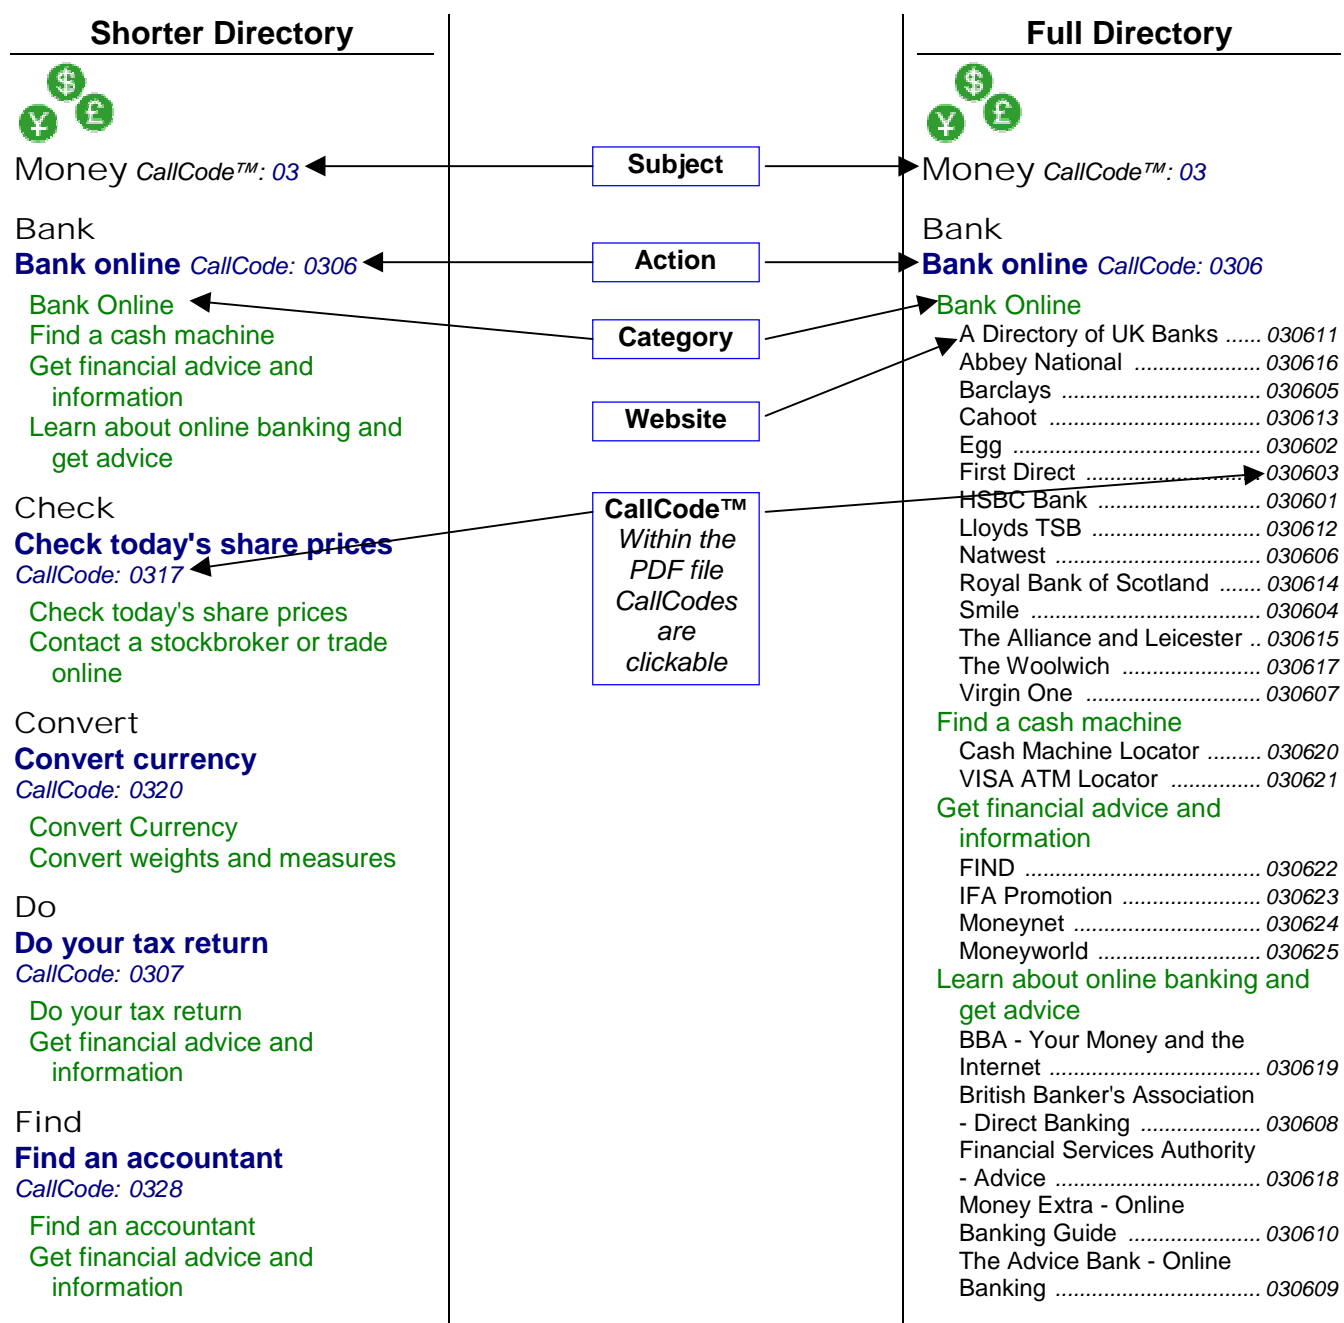

We hope you will enjoy using 1DO3 and get a lot out of it. If it works for you, please don't hesitate to pass on the news, and a copy of this directory, to your family, friends and colleagues.

How to use the 1DO3 directories

1DO3 Directories come in two 'flavours', Concise, and Full. Examples from each 'flavour' are shown below. Both are available on the 1DO3 Offline Member's CD.

Why are there two different kinds? Because different people like different levels of printed information - it's as simple as that. And since it is as easy for us to produce one kind as any other is, you get them both on the 1DO3 Offline Member's CD and have the choice as to which one you print out and use.

Using the 1DO3 Directories

Begin by finding a reference to whatever it is that you want to do! Your best start is to figure out what subject it might come under, which is usually pretty obvious. For example if you want to 'Bank online', Money is a likely subject to look under. Nobody thinks quite the same about these things, so some actions sit under more than one subject heading.

If you are using the Concise 1DO3 Directory, you can see how the websites have been categorised for the action you are interested in.

With the Full 1DO3 Directory, you can see even more detail - the names of all the websites in each category at the time when the directory was published. These website lists may have changed on the 1DO3 website as sites have been added or deleted.

Once you have established that 1DO3 can help you, you have two choices about what to do next:

1. Open 1DO3 Offline, if you have it. It comes on the same CD that this document came from. The offline version is much quicker to navigate than the online version – up to 50 times faster according to the capability of your CD drive and whether you have installed 1DO3 Offline on your hard disc. It will enable you to very quickly review the full descriptions of each website in the 1DO3 lists, without having to go on to the net and spend time there.

2. Alternatively, simply connect to the net and go to www.1do3.com. There you can still see the full descriptions of each website in the 1DO3 lists, though not as quickly.

Whichever choice you make, once you are at the 1DO3 web interface, you can locate the place you want to go to by:
*   Clicking on the relevant subject.
*   When the subject page has loaded, click on the relevant action.
*   When the action page has loaded, click on the website you want to visit.

3 clicks and you're there.

CallCodes

You can also navigate 1DO3's website using CallCodes™. These are the numbers shown in the directories, at the end of each line. To use them, you simply enter the CallCode in the box at the top of the 1DO3 website screen, and press 'enter' or click the 'Go' button.

CallCodes take you straight to the page or website that you want to get to, saving you clicks and download time when you're online. The use of CallCodes can save you up to two thirds of the time you need if you are clicking through the site.

Apart from wanting to speed things up as much as possible, we also wanted a way to type in references to websites that got round the horrors of typing things like http://www.somesite.co.uk/tools/something.html.

In fact the fastest way to get anywhere on 1DO3 is to type www.1do3.com/{CallCode} into your browser eg. www.1do3.com/050902 which takes you to Computing & Technology>Throw my computer out of the window>Crochet Creations website!

Finally

If you happen to be looking at this document as an Adobe Acrobat (PDF) file, rather than in a printout, all CallCodes in the directory are clickable and will take you online to the place where you want to be.
