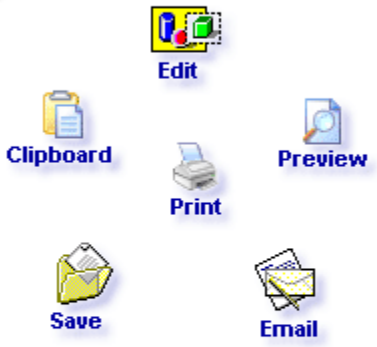
With SnagIt, taking screen captures is as simple as 1-2-3!

Start Tour

1 Select the desired input.

2 Select the desired output.



3 Click on the Capture button.

Click any button to explore more ways to capture, edit, and organize anything on your screen.

Entire Screen	Window	Object	Rectangular Region	Menu	Add-Ins	Edge Effects
Scrolling Window	Game (DirectX)	Preview Window	Edit Capture	Browse in Catalog	Developer Tools	Create Icons

{ewc snaghelp.dll, CheckBoxReg, Show on startup|Software|HelpOnStartup}

Input

Input menu options allow you to choose exactly what you want to capture on the desktop.

Output

Output menu options allow you to choose what happens to the capture once it is taken.

Capture

1. To take the capture, press:

Capture Button Default Hotkey

2. After the capture, within the Preview Window, choose:

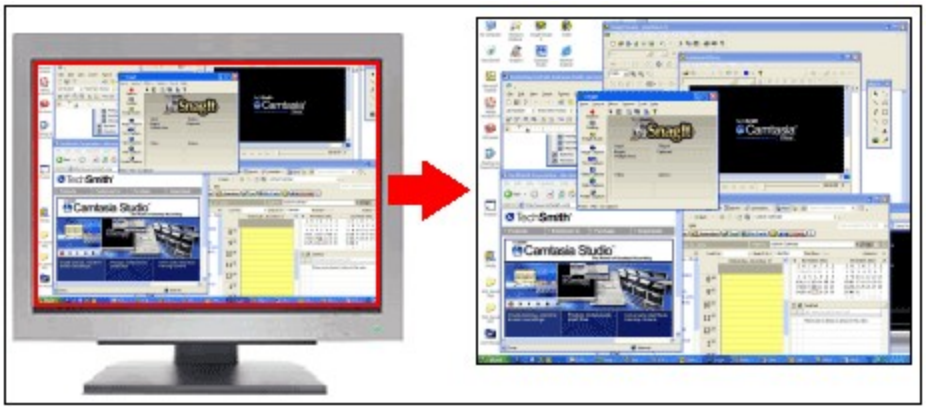
Finish to send capture to output.

-OR-

Cancel to delete the capture.

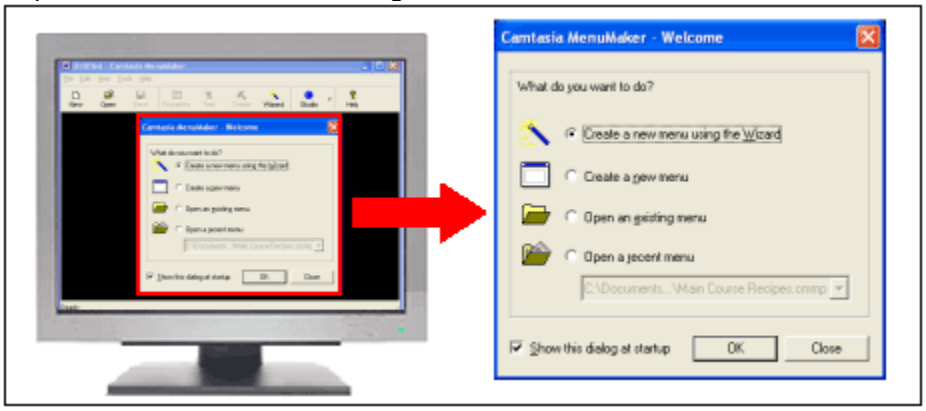
Entire Screen

Capture everything that shows on your computer desktop including the cursor if desired.



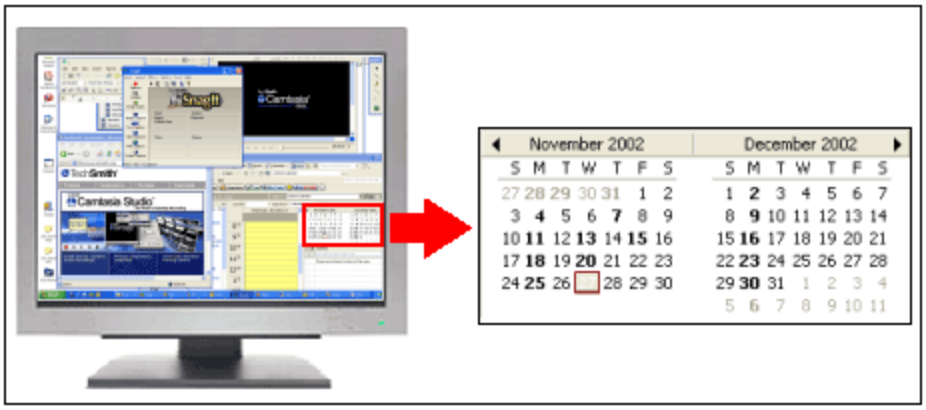
Window

Capture a selected window, dialog box, etc.



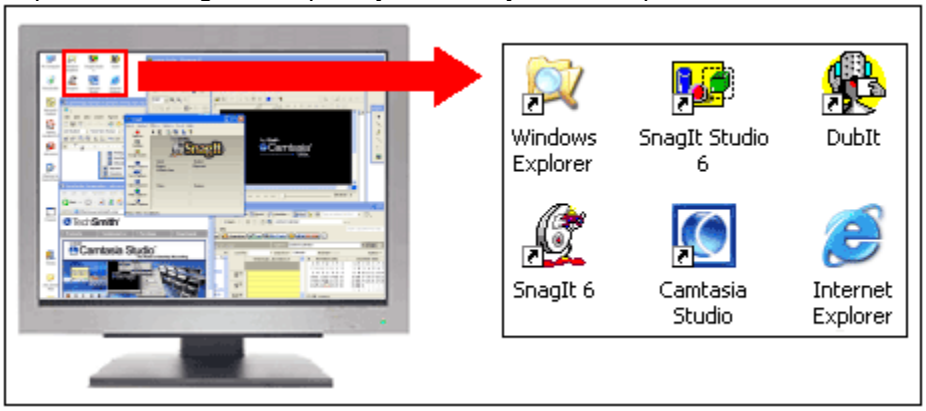
Object

Capture a specific item on your computer desktop such as a button, icon, toolbar, dialog box, etc.



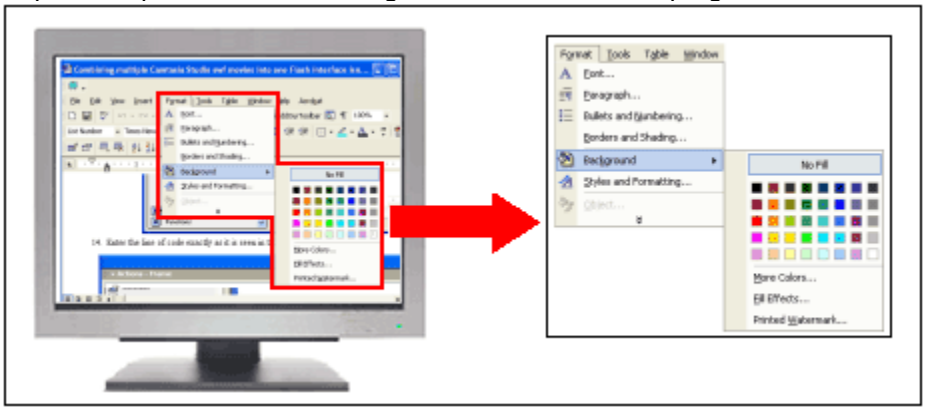
Rectangular Region

Capture a rectangular shape anywhere on your desktop.



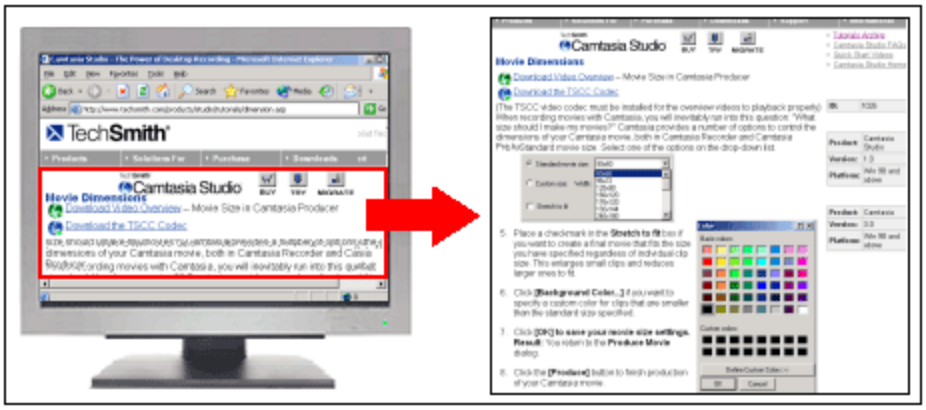
Menu

Capture dropdown and cascading menus from Windows programs.



Scrolling Window

Capture the contents of a window, including the part not seen, both vertically and horizontally.

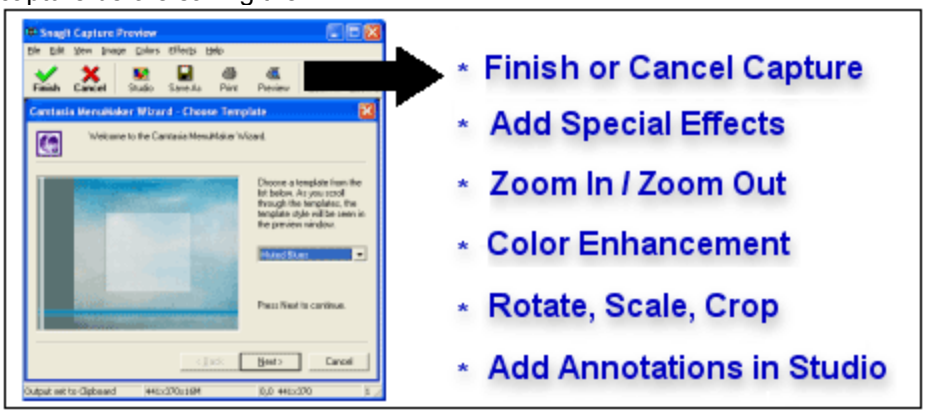


Game (DirectX)

Capture scenes from DirectX games.

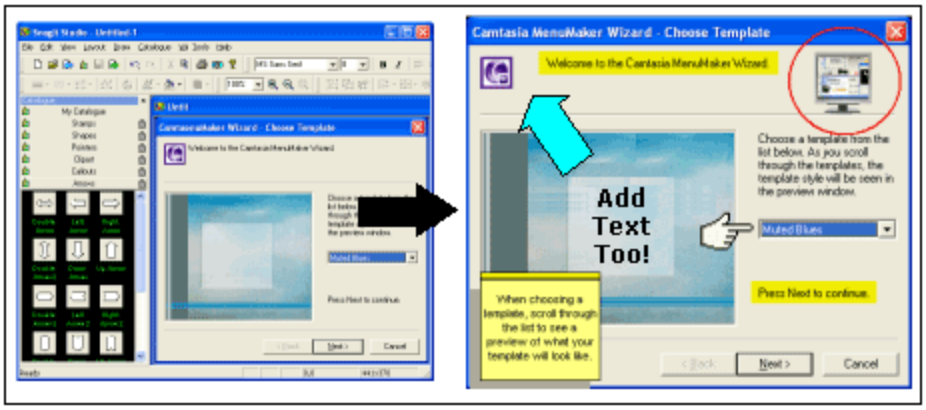
Capture Preview Window

The Capture Preview Window allows you to view and edit the images you capture before saving them.



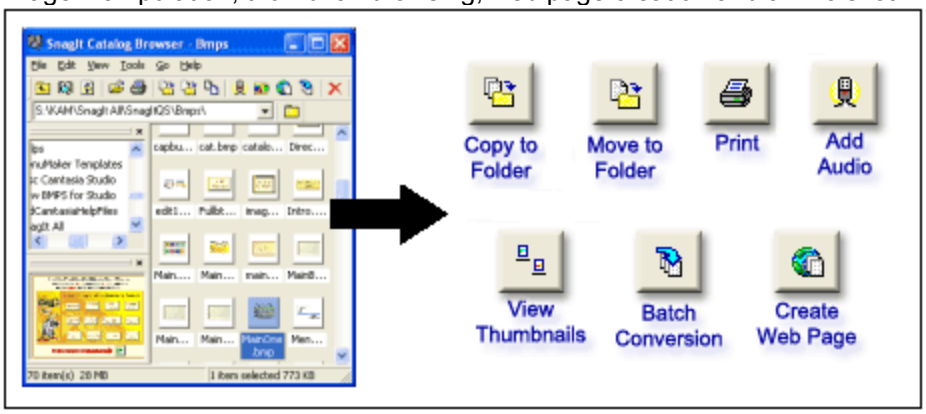
Edit in SnagIt Studio

Studio allows you to enhance your capture using graphic annotations such as callouts, arrows, shapes, text, clipart, and much, much more!



View and Organize Images with Catalog Browser

The Catalog Browser is a powerful tool for file sorting, batch operations, image manipulation, thumbnail browsing, web page creation and a whole lot more!



SnagIt Add-Ins

SnagIt add-ins are small custom toolbars in your Microsoft® Word®, PowerPoint®, Excel®, Internet Explorer®, Windows Explorer®, and Adobe FrameMaker® applications.

With just one click of the mouse, SnagIt add-ins make it extra easy to capture anything on your screen while giving you complete control over every aspect of the screen capture process – all from within your familiar desktop working environment - all with just one click of the mouse.

For more information, go to More about SnagIt Add-Ins.

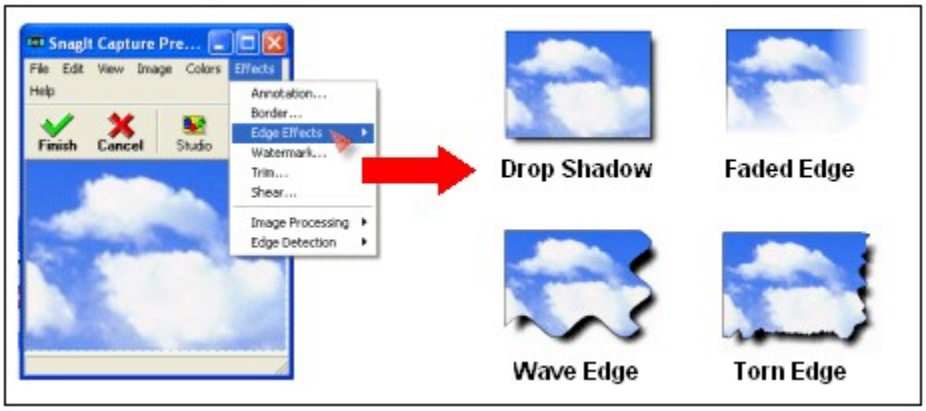
Developer's Tools

SnagIt can now be accessed as a COM server. This means you can access SnagIt's capture functionality from any programming language that supports COM. Developers using Visual Basic, Visual C/C++, Visual Studio.Net, Delphi, C++Builder can now embed and control SnagIt directly in their applications.

For more information, go to More about SnagIt Developer Tools.

Custom Edge Effects

SnagIt's Custom Edge Effects contain a wide variety of filter options for altering the edges of your screen capture. This includes a torn, faded, or wave look along with the ability to add a custom frame and drop shadow. The Edge Effects can be applied as a filter before you capture or within Preview Window after you take your capture.



Creating Icons

SnagIt allows you to take a screen capture and save it as an icon (.ico) file. Icon capture options include the ability to append numerous sized icons to one icon file, automatic file naming, and more.

SnagIt Tutorial Videos

SnagIt is actually five great capture tools in one easy-to-use software application. No other capture software has this incredible capability to capture anything on your desktop.
