

Opener

docAPP.tiff \rightarrow docPS_1.tiff \rightarrow docShar.tiff \rightarrow

docTar_2.tiff \rightarrow docZ_1.tiff \rightarrow ...

o *Where to find Opener:*

Opener is distributed as four files:

Opener_x.x_MAB.README	(README)
Opener_x.x_MAB.tar.gz	(the app itself, plus utility binaries)
Opener_x.x_MAB_source.tar.gz	(all app sources and test files)
Opener_x.x_MAB_utils.tar.gz	(utility sources, including makefile modifications for NEXTSTEP)

(where x.x is the current app version number) The last two files are necessary only if you plan to modify Opener or the public-domain utilities it uses. The latest version should always be available from:

ftp.cs.orst.edu:software/next/binaries/util **or**
sonata.cc.purdue.edu/pub/next/binaries/util

o *To install:*

Simply put *Opener.app* in the appropriate *Apps/* directory.
