# appDidInit:

## A WORLD OF SUMMER OBJECTS

As the cover illustrates, this issue of the *OpenStep Journal* offers a grab bag of goodies for your summer enjoyment.

There's another installment of PDO, articles on interfacing to the SAP R/3 system, multiple displays, the new ATA and ATAPI standards, and the NICE testing program, as well as more about network startup from the Village Smythy.

My mission as the new journal editor is to bring you useful information on time every quarter. (Watch for an intriguing Fall issue.) As usual, your comments are appreciated, so use the feedback form to let us know what you think.

My special thanks go to James Stockford for his immeasurable help in getting out this issue of the journal and to Karin Stroud, Daniel Marusich, and Terri FitzMaurice for helping make it happen on a very aggressive schedule.

Get yourself a glass of ice-cold lemonade (or the beverage of your choice) and read on.

*ÐJudith Starnes, Editor*
