HELP YOURSELF TO HEAPS OF INFO

If you haven't tried the NeXTanswers™ automated information retrieval system, you're missing a great programming resource. NeXTanswers has information on many NEXTSTEP topicsÐconfiguration information, development examples, answers to frequently asked questions, software patches, drivers, past issues of *NXApp* and the code that goes with them, and more.

Best of all, NeXTanswers is free and easy to use. To use NeXTanswers by Internet e-mail, send mail with the subject ^ahelp^o to **NeXTanswers@next.com**. To access it through anonymous **ftp**, connect to NeXT at **ftp.next.com**. To get NeXTanswers via fax using a touch-tone phone, call (415) 780-3990 within the United States. Try it today!

SPEAK UPÐSEND IN YOUR SURVEY!

Have you filled out and sent us your survey on NEXTSTEP Developer Documentation? Well, what are you waiting for?

Your feedback is essential, because it lets us know what information you need to be effective. We'll use the information we receive to determine what kinds of documentation you need, in what media, on what topics.

The survey is part of the article ^aImproving NeXT's Developer Documentation,^o in *NXApp* Volume 1, Issue 2 (Spring 1994). If you didn't receive the Spring issue or if (oh no!) you can't find it, the survey is also available through NeXTanswers as document #1583. Please fill it out and send it inÐwe're waiting to hear from you!

YOUR ARTICLE HERE

Do you have a great debugging technique, a new application architecture design, or a hot programming tip? Would you like to share it with other NEXTSTEP developers and gain their heartfelt thanks and respect? Then write an article for *NXApp*!

We're looking for interesting articles that can help NEXTSTEP developers write amazing software. Your article can be just a page long, or up

to a dozen pages. Usually you'll create a sample program to accompany the article. (So much the better to show off your programming expertise!)

You don't need to be a prizewinning author to write great *NXApp* articles. Editors will work with you on your article's organization and wording, artists will help you turn your sketches into professional graphics, and technical reviewers will thoroughly scour your work for accuracy. In the end you'll have an article you'll be proud to show to your boss or your mom, and the world will benefit from your great ideas.

To find out more, check out the articles in this and past issues, then send an abstract and an outline to **NXApp@next.com**, or to:

Cynthia Closkey
Editor, *NXApp*
NeXT Computer, Inc.
900 Chesapeake Drive
Redwood City, CA 94063
U.S.A.

We'll send you guidelines for writing *NXApp* articles, along with information on schedules and our great bonuses for authors.
