NSDPSContextNotification

Adopted By: no OpenStep classes

Declared In: AppKit/NSDPSContext.h

Protocol Description

The NSDPSContextNotification protocol supplies information about the execution status of a sequence of PostScript commands previously sent to the Display PostScript server.

Instance Methods

contextFinishedExecuting:

 – (void)**contextFinishedExecuting:**(NSDPSContext *)*context*

Notifies the receiver that the context has finished executing a batch of PostScript commands. See **notifyObjectWhenFinishedExecuting:** (NSDPSContext).
