

WEB GRAPHICS

Try out the ubiquitous Paint Shop Pro by Jasc Inc , the shareware version, with v4.12 for Windows 95 and v3.12 for Windows 3.1. (<http://www.digitalworkshop.co.uk>) . Quick and comprehensive, it's ideal for web resolution graphics. On the Gif side of things, you Apple Mac folk have the rather splendid freeware Gif Builder to dabble with, (do send him a postcard!) whilst you Windows people have the dinky Gif Construction Set to try out (<http://www.pandasw.com/gifcon2.htm>).
