

The Web Centre is the place to come for those handy tips and indispensable tools, so that you can build your very own 'killer Web sites'. Who knows, you could soon have your site featured in our Readers' Web Sites corner.

There's the instalment of our 'Hands On HTML' masterclass from Issue 32 (for the latest instalment, see page 117 in this month's magazine), as well as HTML Editors for both Windows and the Mac, and some very useful graphics programs.
