This is where you'll find your essential dosage of Internet software to get you up and running, all in one handy bite-sized collection. It comes in three flavours Windows 95, Windows 3.1 and Apple Mac.

Once you're online, you might want to consider making your connection 'safe for all the family' (see Susan Wright's article on page 46). On the disc are demo versions of Net Nanny for Windows, and Cyber Patrol for Windows and Mac
