These are the highlights of the CD, filled with fun, drenched in excitement and hot to trot. For this month, and this month only, we have Weird Stuff Happening in the ghostly form of Superscape's Viscape plug-in for its Internet Tombtown. On a less morbid note, how about browsing the .net Holiday Directory for that perfect break? You'll find it cover-mounted on this month's issue and it has also been translated into HTML format by Cheryl and James Culberston. Moving on to our next guest, .net's very own Cotton Ward features in 'The Time... The Place', where she discusses Internet pornography. And finally, for all those boy and girl racers, there's a demo of the Internet game HoverRace in the PC Gamer Zone.
