

CompuServe Directory

CompuServe is the world's most comprehensive network of people with personal computers. The **CompuServe Directory**, is a concise listing and description of CompuServe's online services.

This complimentary version of WinCIM does not include the **CompuServe directory** in order to save space on the disk.

You can get an up-to-date electronic **CompuServe Directory** with WinCIM by using the GO dialog, and entering the service name **WINCIM**.
