

Madasafish is the UK's first free ISP designed specially for the net generation. Fiercely independent, Madasafish is not tied into any retail chain, finance house or media empire. They don't see why you should have to be either. They don't consider you to be a user, a subscriber, a number or an entry in the balance. With Madasafish you are a member. You help make the service what it is. They challenge you to find a faster Internet connection.
