You may wonder why you'd want pay for an e-mail client, when two of the best available come free with the world's most popular Web browsers. However, AllegroMail is very powerful yet it's incredibly easy to set up and use. It's utilises wizards to take you through all the major features, such as setting up multiple accounts, spam filtering, mail forwarding etc. It has everything you'll need out of a top-end e-mail package but it won't confuse like some of the others.
