

Normally we select a single free JavaScript in this section of the CD, but then we came across this little beauty. AAScripiter is a program cum database that contains more than 150 of scripts. Impressive indeed! Want to put a message in the Status Bar, display a pop-up menu, or how about a script to display 3D text using normal text. It all here and it really easy to find what you want, plus you can view a sample of the script in action and copy and paste the JavaScript directly from AAScripiter. **NOTE FREE ON-LINE REGISTRATION IS REQUIRED TO UNLOCK THIS PROGRAM**
