

# NEW Features in Delphi 3

## **Business Insight -- Turns Data into Information for Better Decision Making**

- \**Decision Cube* crosstabs for multi-dimensional analysis of data
- \**QuickReports 2.0* to easily create, preview and print embedded reports
- \**TeeChart* to turn data into visual information

## **Active Insight -- An Enterprise Component Foundry for Maximum Reusability**

- \**One-Step ActiveX controls* for creating enterprise-wide, industry-standard components
- \**Visual component creation* for instantly creating component templates
- \**Built in COM & DCOM Support* for language interoperability
- \**Packages* -- Leading-edge compiler technology for efficient, native code executables

## **Code Insight -- The Easiest-to-Learn, Most Productive RAD C/S Development Tool**

- \**Code Templates Wizard* for simplified code creation
- \**Code Completion Wizard* to help ensure proper syntax
- \**Code Parameter Wizard* for displaying procedures, functions, methods and events parameter lists
- \**ToolTip Expression Evaluation* for quicker and easier debugging
- \**DLL Debugging* saves time in creating and debugging advanced applications

## **Scalable Database Access for Greater Connectivity**

- \**New database drivers* for MS Access, MS FoxPro, Informix, DB2, AS/400
- \**Updated Native High-Speed SQL Links Drivers* for Oracle, Sybase, MS SQL Server, InterBase
- \**Multiple database engine support* for easy access to any database system
- \**Database Driver Development Kit* for creating high-performance BDE drivers

## **High Speed Web-Enabled Client/Server Applications**

### Support for major Internet Standards

- \**ActiveForms* and *Web Deployment* for deploying thin-client, zero configuration client/server applications using the web
- \**Web Server Extensions* for HTML delivery of data to any browser on any machine using your existing client/server skills
- \**WebBridge* for simplified creation of both NSAPI and ISAPI DLLs, WinCGI or CGI executables

## **Multi-Tier Broker Architecture**

- \**Remote DataBroker* for zero configuration database applications
- \**Automatic Constraint Propagation* for data integrity
- \**Business Object Broker* for failover safety

## **Client and Server Development Tools for High-Performance C/S Applications**

- \**Enhanced SQL Database Explorer* to visually manage data-specific metadata
- \**Enhanced SQL Monitor* to assist testing, debugging and performance tuning
- \**Improved DataPump Wizard* for codeless migration of data
- \**Over 130 components* to build powerful database applications
- \**Cached updates* for increased server responsiveness
- \**Integrated Visual Query Builder* for simplified building of powerful SQL Queries
