

About Manticore Products

Based in Chicago, Illinois, Manticore Products is dedicated to creating innovative products infused with art, humor, and a respect for the human spirit and our planet. Manticore is best known for introducing GALLERY MousePads, a series of high quality computer mouse pads imprinted with the licensed work of leading artists the world over. Working in league with leading museums, private collections, and artists, Manticore has assembled a distinctive collection of images well-suited to our growing family of art-inspired, "smart" products for home and office.

Manticore is, by design, a socially active company and is proud to contribute a portion of its profits to organizations that benefit the arts.

All Manticore Products are manufactured in the USA with a respect for our environment. Our packaging is made of 100% recycled materials, (non-toxic) soy-based inks. GALLERY MousePads are manufactured using 100% recycled rubber. Even the packing materials we use are made from biodegradable corn starch.

You can find GALLERY MousePads in the finest museum, gift, book, stationery, and specialty stores from Topeka to Tokyo.

As always, we appreciate your support, and were interested in hearing from you. Please call us at (312) 595-9800 or e-mail us at manticore8@aol.com with your comments and suggestions.
