Alt+F	Change preferences

Play Caribbean Stud Poker

The Game

Placing an Ante or Bet

Retrieving an Ante or Bet

The Game

At the outset of each hand, you place an "*Ante*" in the treasure chest lid area marked Ante. The ante amounts are restricted by table minimums and maximums.

Each player is dealt five cards face down. The dealer is also dealt five cards, one of which he turns face up for all players to see. As in all stud poker games there is no draw to the hand.

Once you view your cards and the dealer's up card you have two choices, **Fold** or **Bet** on your hand. If you think your hand will not beat the dealer's hand, you may fold surrendering your ante. If you think your hand will beat the dealer's, you may place a bet which is exactly twice your ante. Once you decide to Fold or Bet the dealer will turn all of his cards face up to end the game.

If the dealer does not have an Ace/King (an Ace and a King) or better his hand does not qualify. In such case he pays ante bets at a rate of one to one only to those players that did not fold their hands. If the dealer does have an Ace/King or higher he will pay all antes and all bets of players that beat his hand. The antes are paid one to one while the bets are paid according to the Bonus Payout Schedule.

Regardless of whether the dealer qualifies, if a player receives a hand that qualifies him for the Progressive Jackpot he will win an amount from the Progressive Jackpot as specified in the Progressive Jackpot payout schedule below.

Placing an Ante or Bet

Antes and bets are placed in the appropriately marked areas of the treasure chest directly in front of you. There are principally three ways in which you may place your bet:

- 1) Drag the appropriate number of chips to the ante or betting area using your mouse.
- 2) Double click on the chip denomination you wish to bet.
- 3) Click on the appropriate bet amount in the Commands window.

Note: clicking lower into a chip stack will allow you to drag multiple chips.

Retrieving Winnings, an Ante or Bet

There are two ways to return money from the table to the chip stacks in front of you.

- 1) Drag the chips from the table area to your chip stacks.
- 2) Click on the appropriate action in the Commands window.

Note: when you drag the lowest chip from either the ante payoff or the bet payoff stack, all chips in the bet and payoff stacks will assemble themselves to facilitate movement.

Progressive Jackpots

Optionally, each player makes a **Progressive Jackpot Bet**. The Progressive Jackpot Bet is \$1.00 and qualifies the player's following hand for the Progressive Jackpot. If a player participates in the Progressive and receives a Royal Flush, Straight Flush, Four of a Kind, Full House or Flush on the next hand, he wins all or part of the Progressive Jackpot.

Menu Commands

The menu bar is the standard interface to all of the Casino Caribbean Stud features. Click the mouse on the action you wish to access or Windows users can depress the Alt key in conjunction with the underlined letter of the action.

Game Commands View Options Help

<u>G</u> ame	Select players and buy chips
<u>C</u> ommands	Caribbean Stud game commands
<u>V</u> iew	Controls screen display options
<u>O</u> ptions	Sound, screen colors and programmable options
<u>H</u> elp	Provides access to Help topics

Game Menu

Players	Selecting Players will allow you to add a player, remove one and/or move them around the table.
Buy Chips	Buy Chips allows you to buy more chips for any of the players.
Exit Caribbean Stud	Exits from the game automatically saving the current settings.

Commands Menu

The Caribbean Stud playing decisions may be selected through the Commands Menu. Most all of the game playing decisions may also be implemented via Mouse Movements.

View Menu

The View Menu has a number of settings which are represented by a check mark, When checked an item is visible on the viewing screen.

Progressive Meter	Allows you to toggle the Progressive Meter display on/off. Toggling it off will help speed play on slower computers.
Command Button	Toggles the Command Button on/off.
Payout Tables	Displays the payout tables for winning hands and progressive payouts.
Play Results	Play Results displays a dialog show you how well each player is doing.
CD Player	Selecting CD displays the CD Player controls. This entry will be disabled if you don't have a CD Player. Note: some CD Player drivers don't respond properly if there is not a CD in the drive when the game is started. If you have a CD Player and this entry is disabled, try putting a CD in the drive and restarting the game.

Options Menu

Sound	Toggle sound effects on/off.
Background Color	Change the table felt color.
Preferences	Modify game timing, right mouse button functionality and messaging.

Help

The Help Menu includes the following selections:

Index	Selecting this option will give you an index of all available categories for which you may obtain help.
Menu Commands	Selecting the Commands option will give you a listing of available game commands.
Keyboard	Gives you help with the keyboard commands.
How to Play	The How to Play option will offer help on how to play.
Search On	Search On allows you to search for help.
Using Help	Explains how to use the Windows help system.
About Caribbean Stud	Displays information about this version of the game.

CD Player

You may play any of your favorite music CDs in your computer's CD-ROM drive while you enjoy your game. If a CD-ROM drive is present on your system, you will be able to select the *CD Player...* menu item.

Once selected, you may place the CD Player dialog box anywhere on your screen by dragging the CD Player Title Bar to the desired screen location. Clicking on the *System-Menu* box, in the upper left corner of the CD Player dialog, allows you to move, close or alter the dialog box appearance. If the System Menu box is not visible, double-clicking in the white area of the CD Player window will cause it to appear.

Status	shows the current CD track, the total number of CD tracks and the elapsed time into the current track.
Buttons	makes the CD play, stop, previous track, next track and eject control buttons visible.
No Title	shrinks the dialog box by eliminating the Title Bar. Double-clicking on a blank area of the dialog box will cause the Title Bar to re-appear.
Small Buttons	shrinks the dialog box by making the control buttons smaller.

Note: some CD Player drivers do not respond properly if there is not a CD in the drive when Caribbean Stud is started. If you have a CD Player and this entry is disabled, try putting a CD in the drive and restarting Caribbean Stud.

Mouse Movements

Mouse movements can significantly speed and add enjoyment to game play. Below is a list of the Caribbean Stud Poker mouse movements.

<u>Action</u>	Mouse Movement
Ante or Bet	Drag chips from chip stacks to appropriate location. Double clicking on chip stacks will also place an ante or bet.
Deal or Remove Cards	Hold left mouse button down and drag mouse toward screen bottom.
Fold	Drag cards toward dealer.
Remove Payoffs	Drag chips toward player's chip piles.
Remove All Payoffs	Drag bottom chip of a payoff or bet stack to assemble all chips onto one stack for removal.
Sort Cards	Double click on cards showing.
View a Player's Credit	Click on a player's chip stack or bet area then see the status line.
