Welcome to Road Rash for Windows ® '95 !!!

This file details the procedure to get this prerelease Road Rash ™ demo running on your system and features of the demo and shipping product. We've really had a good time playing Road Rash on the PC and wanted to get it out to the public as early as possible; but remember, Road Rash is still in its development stage and won't be finished until early this fall. **Please read all of the following important information including the section on Direct X under System Requirements before starting the Road Rash demo.**

Find out just how fast your PC really is. Road Rash, the most aggressive motorcycle racing/combat game ever, explodes on your Windows '95 PC with hard-hitting, full throttle action that'll bring you to your freshly skinned knees. Dodge traffic, outrace cops, and thrash pedestrians on your way to winning the Cup and becoming the menace to society your mother always worried about. Nobody said you had to do this alone, so race/battle up to seven of your so-called friends in network mode or go mano-a-mano in vicious modem play. Developed with Papyrus (Designers of NASCAR™ & INDY 2 ™), Road Rash will blow you away with its high resolution SVGA graphics and amazing sensation of speed. Remember, nice guys will always finish last!!

CD Demo features
Level 1 Peninsula track
Thrash mode
Two videos (1 pre-race, 1 win)
1 soundtrack song "Kickstand" from Soundgarden
Support for English, Spanish, Italian, French and German

RR SYSTEM REQUIREMENTS
IBM PC and Compatible
Pentium 75 or better
16 MB of Ram
Direct Draw compatible video card with 2mb ram
Direct Sound compatible sound card
Double speed cd-rom or better
DirectX 2
- To run RR, you **MUST** have the latest Direct X drivers for your Sound and Video cards. It is recommended that you check your hardware manufacturers website for the latest driver updates. In addition, if you haven't already loaded DirectX 2 from another 'Windows '95

Native' product, then you will need to install DirectX 2. **NOT HAVING THE LATEST DIRECT X DRIVERS MAY CAUSE SYSTEM DIFFICULTIES.**

Running Road Rash

Go to the Start menu and select RUN. There you will select BROWSE, click on the Road Rash icon at your cd-rom drive location. Then open the Road Rash directory. Here you will click on DEMORASH and the game will start up. You then want to go straight to the RESTROOM and select CONFIGURE INPUT. Here you can select which keyboard or joystick settings you prefer. Once this is completed, you should select GAME MODE. Here you can either try out our THRASH MODE (Single player) game. If you need to install Direct X2, you will browse the DIRECT X directory on the cd and click on the DIRECTX setup icon.

ORDER ROAD RASH NOW !!

If you like what you've seen so far and want to be first to have the full version of Road Rash, call our Direct Sales department (800) 245-4525 to pre-order one today or visit your local software reseller this fall.
