

### Triads

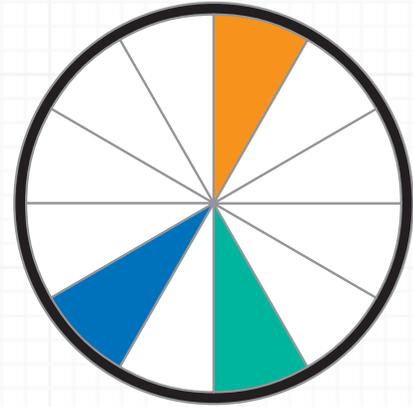

Triads refer to three colours that have equal distance between each other on the colour wheel. They contrast with one another and give a powerful effect.

### Complementary

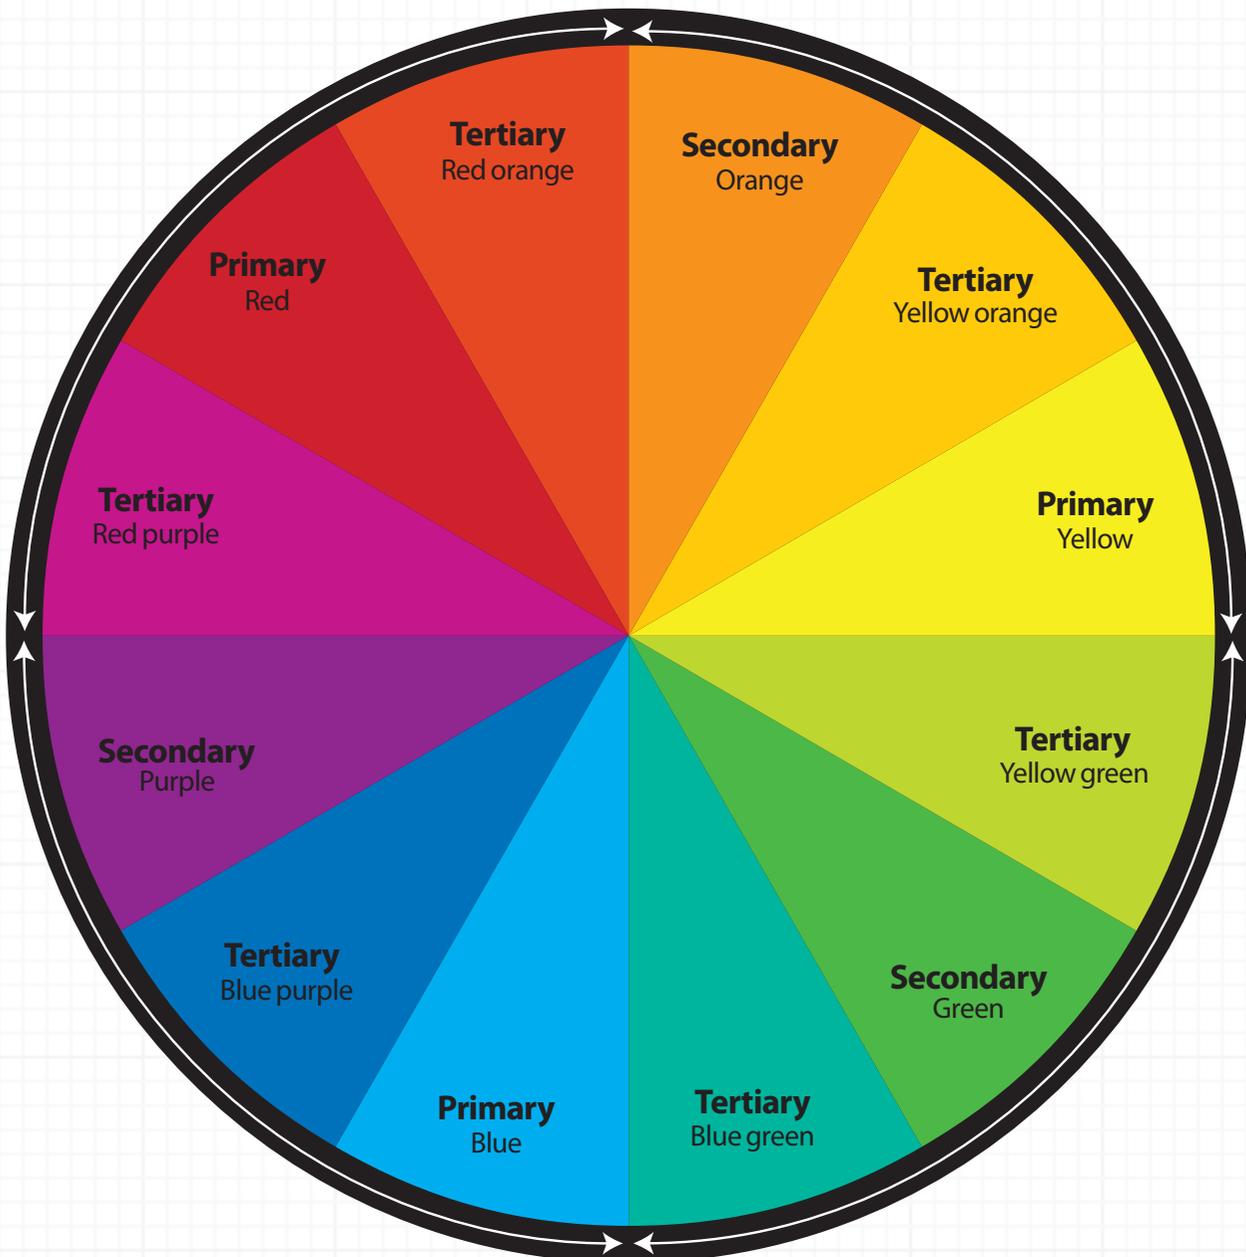

Complementary colours are opposite each other on the colour wheel and give vibrant results when used together. You can also use them to fix colour casts.

### Split Complementary

This relationship is made up of three colours. The principal colour and then two colours next to the complementary colour of the principal.

### Warm

### Cold
