COPYWRITER

Thanx for using CopyWriter!
I am developing and maintaining CopyWriter just for fun. It's a basic editor, build the way I like it. I hope people do recognize quality behind basic looks.
CopyWriter is around for more then two years now, and still most time is spend finetuning the program. I've downloaded enormous amounts of other programs to find out what I do like and what not. The result is CopyWriter. Not to much functions, but enough to complete a wide range of tasks.
I wish to thank all the people who support me with suggestions, tips, code and encouraging thank-you emails. Without these people CopyWriter wouldn't be what it is: the Swiss army knife off editors.

More information
Details about the program can be found in the documentation file, wich can be reached by pressing Ctrl+F1. CopyWriter has a lot of functions that are not incorporated into the menu. To get an overview of this functions, press F1.

Major changes since Version 2.02
- Customize the Tools menu with CopyWriter utilities.
- Optimized Word file open functions.
- Optimized Install and Uninstall functions.
- Large code cleanup to make the program faster and more reliable.
- A enormous amount of tiny bug fixes small changes.

License
By using CopyWriter you agree with the license wich is included in the documentation file and can be found at the end of this file.

VERSION HISTORY

Version 2.03 (2003-08-26)

New
- Users can customize the Tools menu by placing shortcuts in the CopyWriter folder.

Improvements and code optimization
- Old associations are now restored after deinstallation or unchecking the association checkboxes on the Settings form.
- Optimized Word file open functions. Don't need external converter anymore.
- Internal code cleanup to make program faster, smaller and more reliable.
- Improved Text Specifications form (mixed formatting specs are now showed).
- My Files and Recent Files dialog buttons are now properly enabled/ disabled.
- Changed extension processing in Save procedures (Filter dependant,

not extension dependant).
        - Modified and improved Fullscreen function (no screen flicker,
          position is better remembered).
        - Goto Line command scrolls now to nice position in stead of screen
          bottom.
        - Find function scrolls now to nice position in stead of screen bottom.
        - Optimized print function (no flickering screen anymore).
        - Auto Words form now utilize Copy/Paste functions.

   Bugfixes
        - When changing the default filetype the filetype of the current open
          file was changed.

   User interface and cosmetical
        - Replaced original icon with square shaped icon.
        - Changes flat look to standard Windows look.
        - Changed default font from Verdana to Courier New.
        - Standard View option is now called Writers Mode, wich is not
          the default.
        - Removed Basic Menu option.
        - Added Custom popupmenu to Find dialog.
        - Removed Maximize/Restore and Minimize functions from View menu.
        - Changed Settings shortcut to F4.
        - Changed Fullscreen, Maximize/Restore shortcuts.
        - Removed Minimize shortcut.
        - Main window is now centered on screen when application is first used.
        - Documentation menu item is now hidden if Documentation files doesn't
          exist.
        - Fixed problem that prevents the Auto Words menu item to show correct
          on first run.
        - Changed Additional Functions layout.
        - Modified Details form.
        - Removed Sean Young and D-TNT from Credits form.
        - Added Robert Dunn and Peter

Version 2.02 (2003-04-23)

   New
        - Can open Wordfiles!
        - Option to close program with Esc key.

   Improvements and code optimization
        - My Files Open dialog uses now same filters as Main Open dialog.
        - Binary Files are now 100% read only.
        - Improved extension processing (not case sensitive anymore).
        - Switched inc/dec Fontsize and inc/dec Indent shortcuts.
        - After Fullscreen command focus was lost. Fixed problem.

   Bugfixes
        - None.
