

## **NotePad XP Version 1.0.0.114 Readme (Win95, Win98, WinME, WinNT4, Win2000, WinXP)**

### **What is " NotePad XP"?**

Do you hate the size limit and the boring look of the notepad in Windows? Do you want an Office XP style notepad that is more functionality than the notepad?

If the answer is yes! Then you found the right software --- The NotePad XP.

NotePad XP is a replacement of the Windows' notepad. It is written in Delphi. I wrote this software because I hate the size limit of the Windows' notepad and its boring look.

Here are the features contained within the NotePad XP:

- All the features in the Windows' notepad;
- Office XP menu and buttons style;
- No size limit;
- Display time in the status bar;
- Display Row and Column number in the status bar;
- Display hints in the status bar;
- Display file path in the status bar;
- Align text to Left, Center and Right;
- Bullets within text;
- Customize your own toolbar;
- Open Rich Text Files;
- Easy access to the main function;
- And much more;

### **About Me?**

Right! Let's talk about me. My name is Alan Chong. I am a Delphi programmer. I also learnt QBasic but I don't like it because it is not good enough for programming anymore now. In fact, I am just in the early stages of learning Delphi. I wrote this software during the summer of 2001, However, I was in my first year of 6th form doing 'AS Level' in Computing, I.T, Maths, Physics and Chemistry in England. And now, my second year of the 6th form doing 'A Level' to all of my AS subject except I.T. I therefore know that much for my time will be taken up with my school work, this mean that the development of this software will be dramatically slow down after the most stable version released. Hopefully, I will make other software in the next summer holiday.

As a beginner, it is difficult to prevent bugs in software but I am trying my best to keep it as bugs free as possible. However, if you find a bug, you must quickly to send it to me by e-mail and I will try to fix it as soon as I can. If you also have any comments about this software, you can also send them to me by e-mail. Ok, hope you enjoy using this software.

### **Known issue of this version of NotePad XP?**

None. See history.txt for the NotePad XP history.
