

## Introduction

**DiskCopy** is a simple little 32-Bit program for formatting and creating duplicate disks. Unlike Explorer and File Manager, which need to read the source disk for each duplicate disk you wish to create, **DiskCopy** will prompt you for the number of copies you have in mind, making for a much quicker operation. **DiskCopy** does not do a track by track copy - it simply copies the directory structure, files, and the volume label of the disk, but 99% of the time, that is exactly what is needed.

## **Format Options**

**Quick Format**

**Full Format**

**Capacity**

**Volume Label**

**Copy System Files**

**Full Boot Disk**

The Quick Format removes all the files from the disk. You should only use Quick Format on disks that have previously been formatted, and that you are certain contain no errors.

Prepares a disk so that you can store information on it. Any files on the disk will be removed.

Select the proper disk size and capacity here. The default is “1.44M”, but you may choose from the other options in the list.

If you wish to label the disk, you must first check the Volume Label option, then type in the desired label. The volume label is limited to a length of 11 characters.

Selecting this option will copy the critical system files on to the diskette, enabling the disk as a startup disk in case of a hard drive failure.

This is similar to the **Copy System Files** option, but, in addition to copying the critical system files, also copies several files which might allow you to correct whatever problem caused you to use the boot disk in the first place. It is very important that you have a boot disk on hand in case of emergency. If you do not have one, use this function to create one as soon as possible.

# Registration

**CT Software**  
**759 Galleon Lane - Elk Grove, IL 60007**  
**USA**  
**1-800-617-7740**

This program is shareware, and, as such, may be used freely for a period of 30 days. If, after the 30 day evaluation period expires, you find this nifty little utility useful, and plan to continue using it, you are required to register the program.

By supporting the shareware concept you are helping to ensure its continuation, which, I think you'll agree, will benefit us all

If you wish to register the program, we do accept **VISA** and **MASTER CARD**. Our toll-free registration number is **1-800-617-7740**. The cost of registration is **\$10.00**. If you would like a copy of the program on diskette, there is an additional **\$2.00** shipping and handling charge.

If you prefer mail, please send a check in the amount of **\$10.00** to the above address. Be sure to include your name, address, e-mail address, and the exact name of the program, so that we can immediately send you the registration information. If you would like a copy of the program on diskette, there is an additional **\$2.00** shipping and handling charge.

If you are a CompuServe subscriber, the program can be registered in the Shareware Registration forum. The SWREG# is 8304.

Upon receiving the check, we will e-mail you the registration code immediately. If you have any questions or comments, please don't hesitate to drop us a line. To reach **CT Software** by e-mail:

**America On-Line - Ron2222**  
**CompuServe - 75264,3237**  
**Internet e-mail - RON2222@aol.com**

If you have more than one removable drive, choose the source and destination drives here, simply by clicking on your choice.

This is where you choose whether to **Copy** or **Format** your disk. The command button at the bottom of the program will reflect your choice.

## CT Software Home Page

Please feel free to visit our WEB site. It will allow downloading and access to complete product descriptions of the very latest version of all of the shareware offered by CT Software, in addition to offering links to other excellent shareware programs. The URL is:

["http://members.aol.com/ron2222"](http://members.aol.com/ron2222).

## Other Programs by CT Software

### CT HotSpot

**CT HotSpot** is a small utility with which you can create 2 hotspots - 1 to turn your screensaver on, and the other to turn it off. This can be quite useful when downloading a large file, doing a tape backup, or when using the Windows 95 utility, *DEFRAG*. Having a screensaver come on during any of these activities can wreck havoc with your computer and your files.

### Notebook for Windows 95

There is one, and only one point to this program - to replace Notepad. **Notebook** is not a word processor. Its sole purpose is to view and edit text files. **Notebook** does have 6 major features (and several minor ones) which we believe make up for Notepad's inadequacies:

1. It will open **very large files**, and allow you to edit them.
2. It features full font control - you can set the font name, style, size, and color, and your settings will be saved when you exit the program. It will look better on your screen, and do a much better job of printing.
3. **Notebook** has a toolbar complete with help balloons.
4. **Notebook** features *DRAG AND DROP* text editing. If you want to move a block of text, just use the mouse to select it, and drag it to where you want it.
5. **Notebook** supports overtype mode. While the default editing mode is insert, hitting the INSERT key on your keyboard will change that to overtype.
6. **Notebook** can both print and/or save to a file **selected text only**, if desired.

### Safety Net

**Safety Net** is a highly acclaimed utility for backing up key files by file extension. It has one default setting - to backup key "windows" and system files including INI files, Registry Files, CONFIG.SYS, and AUTOEXEC.BAT- and 5 user configurable options. **Safety Net** could easily backup all of the document and/or database files on your drive, for example, with the directory structure **intact**, and it can ZIP them to disk (*PKZIP is required for this option*)! **Safety Net** can also print file lists, print your directory tree, and make a boot disk.

### Winsock Swapper

The purpose of **Winsock Swapper** is to automate the process of swapping various WINSOCK.DLL files for those of you who use more than one Internet service provider with your default Web Browser. With one quick double-click, you can swap up to three DLL's, and optionally launch your browser. It doesn't get any easier than that!

### YahtC

This game is a clone of the immensely popular game, Yahtzee. **YahtC** combines attractive 3D graphics with extreme ease of use. There are no complicated instructions, and no hidden forms. Each player's score is always visible. A sound card, while certainly not necessary, will greatly enhance the game, which produces sound effects when a player rolls the dice, "zeroes" out a scoring category, or rolls a "YahtC". The game will also keep a permanent record of High Scores, which can be easily cleared at any time. **YahtC** is fully functional, and supports up to 4 players.
