PHP

Scaricare più file Zip in batch

```php
<?php

if (isset($_POST)) {
    $filesToSend = $_POST['files'];
    if (count($filesToSend) > 0) {
        $zipname = time().".zip";
        $zip = new ZipArchive();
        $res = $zip->open($zipname, ZipArchive::CREATE);

        if ($res === TRUE) {

            foreach ($filesToSend as $file) {

                $zip->addFile($file,pathinfo($file, PATHINFO_BASENAME));
            }
        } else {

            echo 'failed, code:' . $res;
        }

        $zip->close();

        header("Cache-Control: no-store, no-cache, must-revalidate");
        header("Cache-Control: post-check=0, pre-check=0", false);
        header("Pragma: no-cache");
        header("Content-type: application/zip");
        header('Content-length: ' . filesize($zipname));
        header('Content-disposition: attachment; filename=' . basename($zipname));
        ob_clean();
        flush();
        readfile($zipname);
        @unlink($zipname);
    } else {
        echo "nothing new";
```

```
    }
}
?>
```

Gestire l'upload di una immagine

```
<script>
jQuery(document).ready(function() {

jQuery('#upload_image_button').click(function() {
 formfield = jQuery('#upload_image').attr('name');
 tb_show('', 'media-upload.php?type=image&amp;TB_iframe=true');
 return false;
});

window.send_to_editor = function(html) {
 imgurl = jQuery('img',html).attr('src');
 jQuery('#upload_image').val(imgurl);
 tb_remove();
}

});

</script>
