Intro:

Astro GC will give you a short astrological analysis of your character. The "Astro" files are based on a friends astrology notes, she has passed away a while back and this program was made in her memory. This is the OpenStep version of an old Atari ST program I made a long long time ago.

This OpenStep version was greatly fixed up. The graphics and some of the text has been greatly improved. There's lot's of color now. Compared to the NEXTSTEP Black and White version I made in 1994.

I hope that you enjoy and find this program useful. Please send me comments!!!
