

# SearchBox

235127\_PixelRule.tiff ↗

Search the wtmp file using two search strings. By default it will search for users who logged into the console for today's date.

You can use this box to search for information on a certain user or maybe when was the last shutdown or reboot.

Try these examples:

String: reboot

Date:

String: shutdown

Date:

Or who used the modem port for today.

String: tty

Date: Jan 29
