

Read Me About Comics.app

version 1.0

last modified 06/19/97

This is a Comic Books Database Management application. My first non-trivial application development on the Yellow Box. See the ^aMy first Yellow application.rtf^o in the Documentation subfolder for more details.

Building the Code

The code was built on the pre-Developer release of Rhapsody. You should just be able to recompile it on any other version, but I'm not promising that.

Restrictions

None I'm aware of.

Other Code Notes

See the ^aMy first Yellow application.rtf^o in the Documentation subfolder for more details.

Known Bugs

None I'm aware of.

Possible Future Enhancements

I plan on adding new display windows and do more interesting stuff as I'm learning them myself.

Other Sources of Reference

The standard developer documentation.

Version History

06/19/97 - release 1.0 for the ^aRhapsody Developer Release CD^o (ES)
