Intro:

CDROMer is a CDROM jewel case labeling program. This program allows you to quickly make labels for the back-cover that also includes the side "titles" which make it easy to see the name of your CDROM in a storage self.

It was written because I have a lot of CDROM's that did not come with their own jewel cases or simply to label my CD-R's that I have. So I bought some empty cases and needed a back-cover so that when they are in a storage shelf, I can see the name of the CD.

I hope that you enjoy and find this program useful. Please send me comments!!!

Localization (Support languages):

English by Eric Tremblay ericet@cam.org
