

# MiscZoomScrollView

**Inherits From:** NSScrollView  
**Declared In:** MiscZoomScrollView.h

## Class Description

The MiscZoomScrollView class defines a scrollview that can zoom its document view if the document view implements the MiscZooming protocol. It gives the user access to zooming with a zoom popup button.

You can use this class in IB by choosing "Group in ScrollView" and changing the class of the scrollview to MiscZoomScrollView in the "Custom class" inspector.
