Intro:

This is simply an example of how localization works under Rhapsody (5.0). In this example the application is localized in English, French and Spanish. The source code is very easy to follow and anyone wondering how localization is done will understand in a matter of minutes after looking at this application.

I hope that you enjoy and find this program useful. Please send me comments!!!

Localization (Support languages):

English by Eric Tremblay ericet@cam.org

French by Ingrid Shelso ingrid@cam.org

Spanish by Nathalie Poirier ericet@cam.org

Translation services are offered for OpenStep and Rhapsody Developers

Please contact me at ericet@cam.org for more info.

History:

- 5.0:** Ported to Apple's Rhapsody (5.0) January 14, 1998
- 2.4:** Added the Spanish language January 2, 1998
- 2.3:** Added flying flag to the info panel. (Click to see...)
- 2.2:** First release. Compiled on OPENSTEP 4.2 MACH.

The Package:

Version 5.0 comes complete in a tar.gz package.
Which includes:

- LocalizationExample.app Intel only binary should compile fine under Rhapsody PPC
- README.TXT This file
- Includes Full Source Code
- Rhapsody binary for Intel

Compiling:

This version includes all the source code necessary to recompile the program from scratch on Rhapsody 5.0 systems.
