MiscFileDragMatrix

Inherits From:	MiscDragMatrix
Declared In:	MiscFileDragMatrix.h

Class Description

MiscFileDragMatrix is a subclass of MiscDragMatrix that only overrides our **cellClass** method so we use the MiscFileDragCell class as our default.   If you use **setCellClass:** to change our default class, make sure the new class is also a subclass of MiscFileDragCell.

Method Types

Class initialization	+ initialize
	+ cellClass
	+ setCellClass:

Class Methods

cellClass

+ (Class)**cellClass**

Returns the cell class we'll use to make our cells (unless **prototype** returns something other than **nil**).   By default it is MiscFileDragCell.

initialize

+ (void)**initialize**

Our class initializer.   Sets MiscFileDragCell to be our cell class.

setCellClass:

+ (void)**setCellClass:**(Class)*dragCellClass*

Sets our cell class.
