

OPENSTEP Enterprise/PDO

Title: PDO 4.2 Prerelease Bundle Creation Fix

Entry Number: xxxx

Creation Date: February 10, 1997

Last Updated: February 10, 1997

Procedure Valid for Release: OPENSTEP Enterprise 4.2 Prerelease 1

Keywords: PDO, Bundle, Solaris

Building Bundles With PDO on Solaris

Although NSBundles now work in PDO 4.2 on Solaris, due to a makefile problem in the prerelease bundles don't build properly (an error occurs when linking). This problem can be fixed by updating **bundle.make** (in **/NextDeveloper/Makefiles/pb_makefiles**) and **libtool** (in **/NextDeveloper/bin**).

Here is an updated copy of **bundle.make**: [bundle.make ↗](#)

Here is an updated copy of **libtool**: [libtool.solaris ↗](#)
