

WebObjects Developer Frequently Asked Questions

Title: WebObjects Developement Frequently Asked Questions

Entry Number: 2125

Creation Date: June 17, 1996

Last Updated: July 1, 1996

Valid for Release: 1.0

Keywords: WOF, WebObjects, Development, Programming, FAQ

-Returning Static URLs
-WebObject Hierarchy
-NS-API
-Additional FAQ's

Introduction

Welcome to *Tech Support Frequently Asked Questions* (FAQ). This document is updated regularly to reflect Apple Enterprise Technical Support's most commonly asked technical questions. You can use this document as a quick reference guide for issues that may or may not be found in the documentation or otherwise be readily available.

When additional sources of information are available about a topic they are indicated in the **See Also:** section. Much of the information in this document is expanded upon in other NeXTanswers documents

and in the on-line and printed NEXTSTEP documentation.

Returning Static URLs

Q. How do I return a static URL?

A. *forthcoming*

WebObject Hierarchy

Q. Can I implement my wo bundles in some sort of hierarchy?

A. WebObjects searches for a reusable component in these places and in this order:

1. The directory in which the WebObjects app executable is (only useful if that executable is in a .app or .debug, i.e. with Pro or Enterprise),
2. The app's directory under the WebObjects document root,
3. The WebObjects document root, <HTTPDocumentRoot>/WebObjects (this was meant as a way to share .wo's across different apps, but a more practical way to do that is to put the shared .wo's in a separate directory somewhere and symlink them to different apps' directories).

NS-API

Q. Is the NS-API version of the web objects adaptor available for both Solaris

and NT versions of the Netscape server?

- A. Yes, both are included with the Pro and Enterprise versions of WebObjects. The source for the CGI and the NSAPI adaptors are on the CD.

Additional FAQ's

Q. Where can I get additional FAQ's?

- A. <http://www.dcs.shef.ac.uk/~malc/NEXTSTEP/WWW/>
http://www2.stepwise.com/cgi-bin/WebObjects/WebObjects_FAQ
