

TeleLogic Kft Szoftverkínálata (1995. 04. 15. állapot)

A TeleLogic kft szoftverfejlesztői OS/2-es platformon fejlesztenek minden egyéb platform számára is (mainframe, DOS, Windows és UNIX). Az OS/2 melletti döntés, mint keresztfejlesztő platform, igen jó választásnak bizonyult, amely a fejlesztés biztonságában, az OS/2 sokoldalú szolgáltatásaiban, illetve nagyon jó ár/teljesítmény viszonyában jelentkezik. Hosszú évek óta használjuk a Micro Focus fejlesztőeszközöket is. Ezen idő alatt rengeteg hasznosítható tapasztalat és alapos szakértelem gyűlt össze nálunk, amelyre Önök is biztonsággal építhetnek. A kínált szoftverek egy részét fejlesztőink is használják, így előre történt megbeszélés esetén, bemutatót is tudunk szervezni.

Elsősorban az általunk ismert és a fejlesztőknél már kipróbált szoftvereket forgalmazunk, de számos olyan szoftvert is ismerünk, amit az árjegyzékünkben nem talál meg. Ezért ha olyan szoftvert keres, amely ebbe a környezetbe illeszkedik, hívjon fel minket bizalommal.

Akció !!!! április-május-június hónapban minden egyes OS/2 Warp-ot vásárló ügyfelünknek általunk válogatott OS/2-es shareware összeállítást adunk ajándékba.

Az árak német márkában (DEM) értendők, kivéve, ahol eltérőem adtuk meg. A vámot, a vámkezelést és sok esetben a szállítási költségeket a következő képlettel számíthatják ki:

$$\text{Ft_ár} = \text{DEV_ár} * \text{deviza_árf} * 1,05 + 25 \% \text{ ÁFA}$$

Az árjegyzék a nagyszámú variáció miatt nem tartalmazza az upgrade ill. a másoli jogok árait. Kérjük érdeklődjék ezek után telefonon.

Több termék vásárlása esetén mennyiségi árendedmény lehetséges. Viszonteladókat szívesen fogadunk, kérjük érdeklődjön a kedvezményeiről!

Az árjegyzék adatai tájékoztató jellegűek. Az információkat a lehető legnagyobb gondoskodással állítottuk össze, mindazonáltal az adatok helyességért felelősséget nem vállalunk:
