I. NEW FEATURES FOUND ON VERSION 3

- 20 templates in 5 different Web page styles (the larger part included in a file you must download - for registered users only)
- Wizards and templates for creating Web pages.
- HTML code syntax checking
- Tags and rules editor for syntax checking
- HTML document evaluation
- Fast and easy image browser
- The great HTMLcat reference for free (\$12 US value)
- 2500 graphics for your Web pages (34 megs to download in 4 different files)
- FTP Manager (requires AceFTP 1.11 or higher)
- Search and replace text in multiple files
- Configuration of toolbars (standard and tabs toolbars)
- New Tables dialog (WYSIWYG) which makes it possible to modify tables inside tables
- Quick tables Creator
- New edit window with automatic indent, and the possibility to use different colors to highlight different elements of the HTML document
- Spell checker (Word95/97 required)
- 50 Java Applets (22 all-new applets)
- Wizards for creating new applets
- 12 Javascripts
- 5 DHTML scripts
- DHTML & JavaScript Tutorials

What's New in Version 3.01 (February 11, 1999)

- A new dialog for the conversion/reconversion of special characters was added. This dialog offers several batches options (masks, specified files, directory, etc..).
- The extended replace displays the list of modified files at the end with the option to save or print it.
- The selection with the mouse in the left margin (mouse click) will now act like in Ms Word.
- The Tags definition file (tags.ref) for the syntax checking is updated.
- The size of the file manager window is now kept.
- The bad relative path with links and references on a network was fixed.
- The speed of conversion/reconversion of special characters was greatly improved.
- A bug in the reedition of several tables inside a table was fixed.

What's New in Version 3.00i (January 15, 1999)

- Addition of the double button style for some buttons on the toolbars.
- A new column "Speed 28K/56K/ISDN128K" has been added for the evaluation of document weight.
- The columns of the project manager will keep their size.
- It's now possible to edit the attribute color with the selection and a click on the right button of the mouse.
- An option in the General preferences "Keep last directory" has been added to resolve some problems with several accounts on a network. This option must be unchecked for this case.
- Several minor corrections has been made in the tables.
- Bug with space between the "Visible extensions" in the general preferences has been fixed.
- The conversion of characters ignores the ASP and JavaScript code.
- A bug when you delete a column or a row in the table has been fixed.
- The custom buttons now keep their data correctly (however, you will need to remake your existing buttons if it's the case).

What's New in Version 3.00h (December 30, 1998)

- Support of non-latin charset (see Editor preferences).
- It's now possible to define your own default visible extensions for the open and save dialogs (see General Preferences -> Extensions).
- A major bug with the shortcut CTRL+S was fixed. The use of this shortcut could create a file of 0 byte.
- A bug with the frames reedition in pixel changed for percentage was fixed.

What's New in Version 3.00g (December 21, 1998)

- Other HTML codes can be reedited (*FORM, LINK, META, BASE, MARQUEE, SPACER*).
- It's possible to edit the content of a cell in full screen (by the contextual menu Edit Cell... in the Tables dialog).
- A preview tab was added in the javascripts dialogs.
- In menu "Documents", a new dialog is present when several documents are open and not all visible in the drop down menu.
- Problems with access violation/memory leak in the code Explorer were fixed.
- A bug in with the frames reedition was fixed.
- A bug in the Compress Tags was fixed.
- The language of the dictionary was not kept.
- Confirmation boxes added in "Extended replace".
- The "Convert Special Characters" now ignores ASP tags.
- Update for applets DianaMenu and Java Banner.

II. INFORMATION ON TRIAL VERSION

This is a *shareware* version of AceExpert that allows you to run the program 25 times. During that time you can use the trial version of AceExpert for free. Once the period expires it will be impossible to run the program even if you download the program again.

III. ORDER ACEEXPERT

There are three ways to order AceExpert:

1. ON THE INTERNET

You can order AceExpert on the Internet. You will need to complete an order form at the following address:

<http://www.visic.com/aceexpert/order.html>

Accepted Credit Cards: MasterCard, Visa, American Express, Discover, Optima, Diner's Club, Carte Blanche and EuroCard.

2. By phone or fax:

You can order AceExpert by phone (514) 875-4444 between 9 am and 5 pm (Montreal local time). One of our Customer Sales Representatives will take your call. We will handle your order during the next 48 hours and send you the registration code by e-mail or send you the installation CD ROM by mail.

You can also fax us your order at the following number: (514) 523-4444.

We accept MasterCard and Visa.

3. By mail:

To order AceExpert by mail, please print the Purchase order found in the trial version in the Help menu. Go to "Help/Register/Purchase Order v3". Please send the Purchase Order with your payment.

IN USA (US Dollars only):

Send money order in US dollars payable to *Visicom Media Inc.*

IN CANADA (CND Dollars only):

Send money order or company check payable to *Visicom Media Inc.*

INTERNATIONAL ORDERS (US Dollars only):

Send money order in US dollars payable to *Visicom Media Inc.*

Once your payment is received, we will process your order within 48 hours and send you the registration number by e-mail or the CD ROM by mail.

Please send your payment to the following address:

VISICOM MÉDIA INC.
1170, Senecal St
Brossard, QC
Canada
J4X 1L2
Tel: (450) 672-0401
Fax: (450) 672-9586

IV. AVAILABLE RESOURCES

To create attractive and interesting Web pages and to transfer your files on the server you can use programs that supplement AceExpert. You can download these programs from the following addresses:

- AceFTP: to transfer your Web pages, images and other files.

<http://www.visic.com/aceftp/>

- GraphSearch: The best way to find graphics quickly on the net.

<http://www.graphsearch.com/>

A list of other available tools that you can download from our site at the following address:

<http://www.visic.com/aceexpert/resources.html>

1. AceExpert v3 Electronic Manual
2. AceExpert's tutorial: *"Create a Web page in 10 easy steps using AceExpert"*
3. JavaScript and DHTML Tutorials
4. 2500 graphics for your Web pages (34 megs to download in 4 different files)
5. AceFTP Electronic Manual
6. 20 templates in 5 different Web page styles (*for registered users only*)
7. Online examples of all Applets, JavaScripts and DHTML included in AceExpert

V. CONTACT TECHNICAL SUPPORT

For questions and problems using AceExpert, please contact our technical support department at the following address:

<http://www.visic.com/aceexpert/techsupport.html>

Note: Only registered users have access for one month to technical support.

Before contacting our technical support department, please read the section *"Frequently Asked Questions"* found in the program's online help.

VI. ABOUT THE BROWSER

AceExpert has an internal browser to view the HTML document you are designing. The browser is automatically installed with the program. It supports HTML 3 code and part of HTML code 3.2

With AceExpert you can use Microsoft Internet Explorer as your internal browser. You can change AceExpert's internal browser for Microsoft Internet Explorer on the General Preferences Menu under the Environment tab. For best performance it is recommended that you have installed Microsoft Internet Explorer version 4.0 or higher.

VII. SYSTEM REQUIREMENTS

Following are the minimum system requirements you need to install and run AceExpert HTML:

1. 486 or higher IBM compatible PC.
2. Operating system: Windows 95, NT 4.0 or higher.
3. 8 RAM (16 RAM for Windows NT).
4. 10 MB hard disk space (minimum).
5. Netscape Navigator 2 or Microsoft Internet Explorer 3 or higher.

Better performance is achieved with 16 MEG RAM and a Pentium based Processor.
