

Macintosh PowerBook Processor
Card Upgrade Kit

November 1995 Service Notices

Overview

This month, the Macintosh PowerBook Processor Card Upgrade Kit is available for upgrading daughterboards of PowerBook 500 Series computers to a 100 MHz PowerPC™ 603e microprocessor. In addition to the module, the upgrade kit includes System 7.5.2, localized on a CD-ROM.

Finished Goods Upgrade

As with all upgrades, the Macintosh PowerBook Processor Card Upgrade Kit is available through Finished Goods and must be installed by an Apple Authorized Service Provider (AASP).

Technical Information

Technical information for the Macintosh PowerBook Processor Card Upgrade Kit is included in this CD (Path: Macintosh Portables, PowerBook 500 Series, Upgrades, Macintosh Processor Card).

Warranty and AppleCare

The Macintosh PowerBook Processor card is covered under the Apple One-Year Limited Warranty. The AppleCare Service Plan is also available for this product if the enclosing computer is covered.
