

Insight Release Notes

This insight product can be run from the CD-ROM, which saves space on your hard drive, or it can be installed onto your hard drive if you have room enough for it. The program will then be available to run without your CD-ROM drive. If you're going to install the program onto your hard drive, consult the list below for the required disk space for each program. Installing Insight for Windows will install all the needed files onto your hard drive, and place a new program group into your program manager.

If you wish to run Insight from your hard drive;
Auto Insight requires approximately 6.5 Mb
Body Insight requires approximately 8 Mb
PC Insight requires approximately 9.3 Mb

Installation

1. Start Windows
2. Insert the Insight CD into your CD-ROM Drive
3. Choose the "Run..." command from the File menu in the Windows Program Manager.
4. Type: `E:\setup` (where E: is the CD ROM drive specification)
5. Click OK.
6. Follow the directions on the screen

System Requirements

- IBM PC or compatible
- 386 or greater
- 4 Megabytes of Memory
- Windows 3.1 or higher
- Hard disk drive (see space requirements above)
- Microsoft Mouse or compatible (highly recommended)

If possible, configure your system in 256 color mode to enhance image quality.

Startup Problems

If you experience difficulties starting your Insight program, check your Windows Setup (WINSETUP.EXE) to see if you are using a video mode with more than 256 colors. If so, try selecting one with 256 colors or less.
