

About Copyto for Windows95/NT4.0

Copyto is a Windows 95 Explorer add-on that simplifies file-management tasks. The applet installs a Copyto menu option to the right-mouse menu within Explorer. You can use Copyto for a variety of operations, including copying, moving, deleting, updating, and synchronizing files in two folders. The program is easy to install and offers straightforward operation. A Help file is provided to explain all the additional features and operating procedures. This maintenance update lets you select the operation mode directly from the keyboard.

- Briefcase like function that can synchronize files in two folders with filetype filtering and excluding specified folders. Display the Operation list before execution. You can select or deselect files in the list by Right click.
- You can run Copyto.exe at the DOS prompt or created shortcut link with command line options.
- Batch operation by using MS-DOS batch file.
- Supports UNC paths.

This software is shareware. (However, the functions to copy, move, delete can be used freely forever)

You are entitled to evaluate the software for up to 30 days without obligation to pay.

After 30 days, if you decide to keep the "full-featured" software, you must register your copy with us for a small fee.

Ver0.50-1.04	- Japanese version only

Environment

Windows 95 and Windows NT4.0(Service Pack 2)

I confirmed the main features work fine with US and Japanese version.

Install & Uninstall

Archive Contents

Install.inf	Setup information file
Cptoshex.dll	Copyto shell extension DLL
Copyto.exe	Copyto program file
Copytoun.exe	Copyto uninstall program file
Copyto.hlp	Copyto help file
Copyto.cnt	Copyto help contents file
Inffile.reg	Registration Entries for ".inf" files
Readme.txt	Readme file

Install

To install Copyto, extract the distributed files to any directory (not using a long filename and full-path name of less than 64 bytes). Then find the new file called "Install.inf". Right-click it, then choose Install.

It is possible that the popup menu for "Install.inf" may not display an install command. This will most likely be if you have associated ".inf" files with a different command. If this is the case try double-clicking the file "Install.reg", this will restore the original association for ".inf" files.

Uninstall

Use the Control Panel, Add/Remove Programs item. Select the Copyto item (listed as "Copyto (Remove Only)") and click the Add/Remove button.

Upgrade Instructions

Follow the installation instructions above.
