Program Overview

Welcome to EZ-Join, the companion software for EZ-Split. EZ-Join takes files that have been split by EZ-Split and rejoins them.

EZ-Join 2.0 can rejoin files created with EZ-Split 1.0, EZ-Split 1.50 and EZ-Split 2.0.

Distributing EZ-Join

EZ-Join is freeware. You can pass the program along to whomever you like.

EZ-Split is shareware, and registered/licensed copies may NOT be distributed!

The software was intentionally written into 2 seperate programs. This was done so that anyone could have/use the joining software (EZ-Join) without having to buy a license. If you want to be able to split files, download & register EZ-Split.

Technical Support

If, by chance you have problems using EZ-Join, please feel free to contact me! I can be reached by:

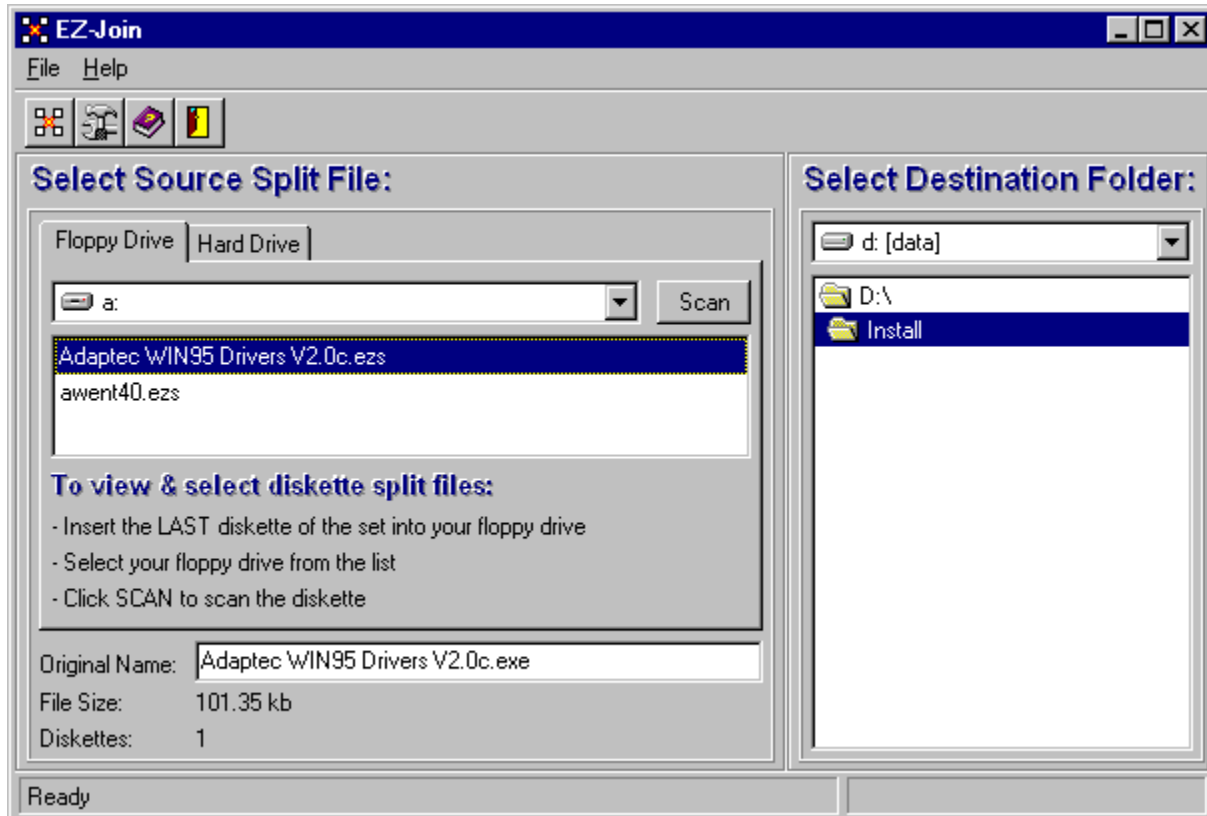

Internet Mail: sandersj@enterprise.net

Compuserve Mail: 74640,3352

Main Window (Joining Files From Floppy Diskette)

A snapshot of the window is displayed below. To receive help on a particular area, click on it with the mouse.

Main Window (Joining Files From A Hard Drive)

A snapshot of the floppy drive destination area is displayed below. To receive help on a particular area, click on it with the mouse.

Command Line Options

Adding a file name to the command line will automatically start up EZ-Join with the specified file selected for joining.

Example: "C:\WINDOWS\EZSPLIT\EZJOIN.EXE [SPACE]
A:\MSIE302.EZS" [RETURN]

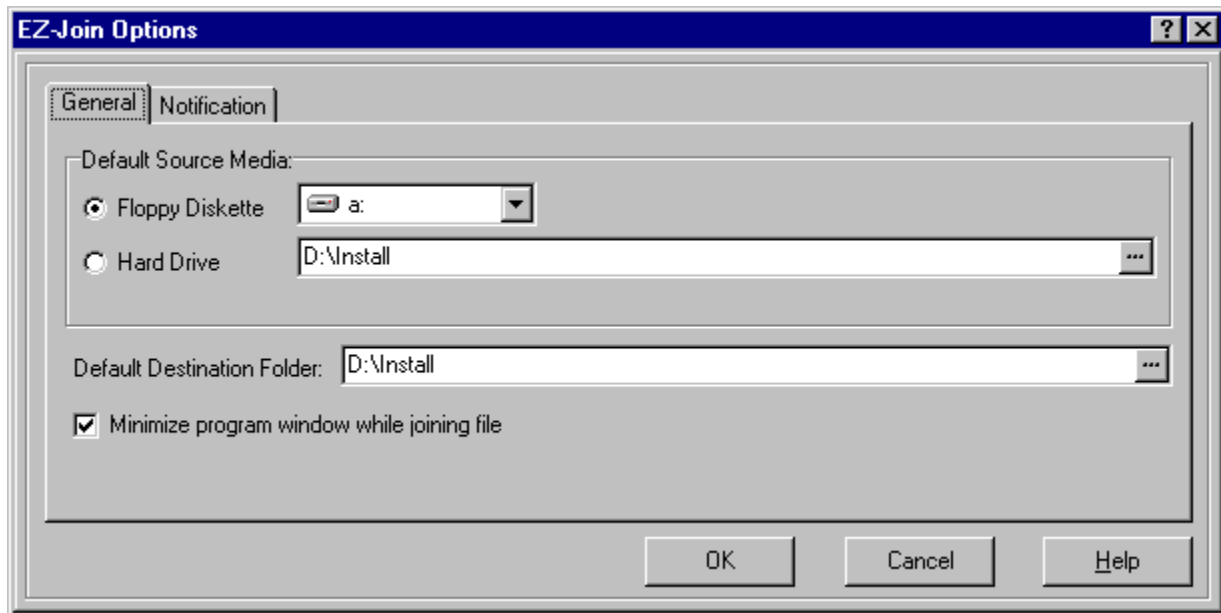

Drag And Drop

Files can be dragged from the File Manager or Explorer and dropped onto the EZ-Join icon. EZ-Join will start with the dropped file selected for joining.

If EZ-Join is already running, you can drop a file onto the EZ-Join window to select it for joining.

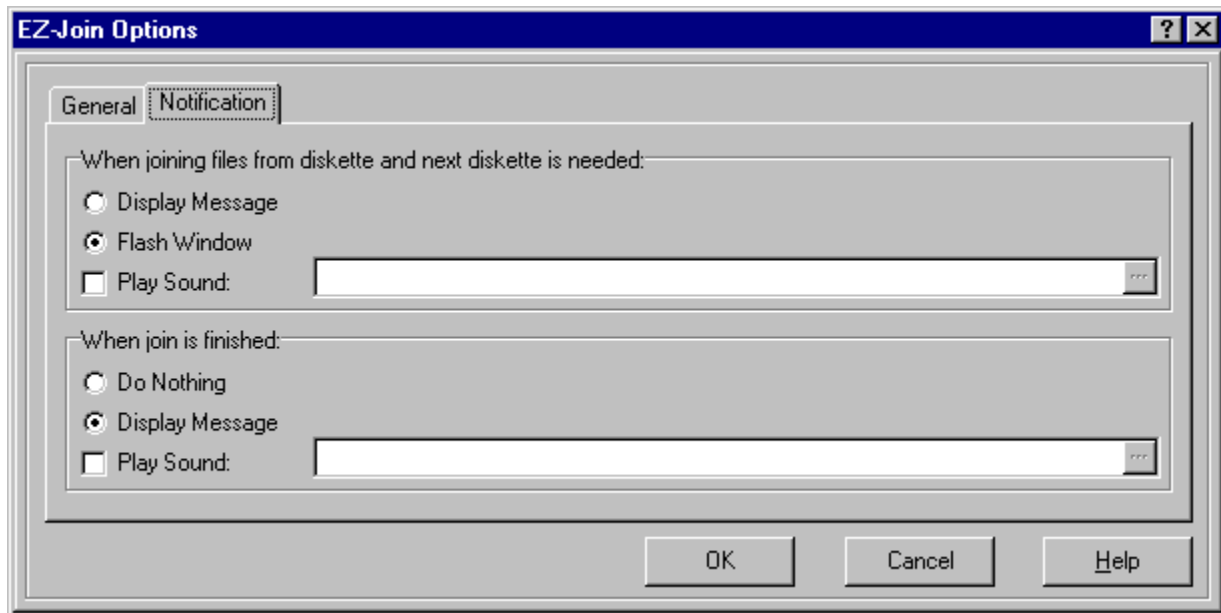

Options (General)

A snapshot of the window is displayed below. To receive help on a particular area of the window, click on it with the mouse.

Options (Notification)

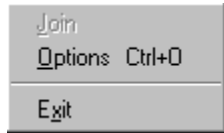

A snapshot of the window is displayed below. To receive help on a particular area of the window, click on it with the mouse.

Menu Commands

To select a top level menu item, either left-click on it with the mouse, or hold down the [ALT] key and press the underlined letter of the desired menu item. This will display a drop down list of available commands. Either left-click on the desired command or use the cursor keys to select a command and press [ENTER].

FILE Menu Commands

HELP Menu Commands

Use this drop down to select a destination hard drive for joined files.

Select a destination folder for joined files from the list.

Select to exit EZ-Join.

Once a file has been selected for joining, select this command to begin. If a file hasn't been selected for joining, this menu item will be disabled (greyed out).

Select this menu item to change the way EZ-Join looks and operates.

Select to view program version information, contact details, etc.

Select to display EZ-Join's on-line help, opened to the Table of Contents.

Discard any changes made to EZ-Join's options and close the window.

Select the default destination drive and folder for joining files. Use the "...\" button to browse drives and folders.

Select this option If you mostly join files from floppy diskette.

Select this option If you mostly join files from a hard drive.

Select the default source floppy drive for joining files.

Select the default source drive and folder for joining files. Use the "...\" button to browse drives and folders.

If enabled (checked) EZ-Join will minimize to an icon while joining a file.

Display on-line help for the current options page.

After a file has been joined, display a message.

After a file has been joined, provide no notification.

After a file has been joined, play a sound. If this check box is unchecked, no sound will be played. The sound file to be played is specified in the text box to the right.

After a file has been joined, the sound file specified here will be played if the "Play Sound" check box has been checked. To browse for a sound file, click the "... " button.

When another diskette is needed, the EZ-Join window will flash. If the program window is minimized, the icon will flash. The window or icon will remain flashing until you activate the EZ-Join window. If EZ-Join is already the active window, no flashing will occur.

When another diskette is needed, display a message.

When another diskette is needed, play a sound. If this check box is unchecked, no sound will be played. The sound file to be played is specified in the text box to the right.

When another diskette is needed, the sound file specified here will be played if the "Play Sound" check box has been checked. To browse for a sound file, click the "..." button.

Save your options and close the window.

When a file is actively being joined, completion status will be displayed here.

Select Source Split File

What this part of the window looks like depends on whether you're selecting files from a floppy drive or a hard drive. Please select which window to display:

☐ Floppy Drive

☐ Hard Drive

How many diskettes make up the split file set.

Use this drop down to select a source floppy drive containing split files.

Use the file list to select a file for joining.

Click this button to rescan the floppy diskette.

If a file has been selected (clicked on) in the file list, it's size will be displayed here.

Use the drive drop down to select which drive to browse. Floppy drives are not listed.

Use the file list to select a file for joining.

Use the folder list to select a folder for browsing.

The drive/folder and filename displays can be resized by dragging the divider.

How many files the split file is made up of.

If a file has been selected, it's original filename will be displayed here.

This part of the status bar will display menu and toolbar tips.
Various program operations will also be displayed here.

Exit Button

Select to exit EZ-Join.
