Current Version (V1.2):

This version of **Freecell** is best run with resolutions of 800x600 or better. Better handling for lower resolutions will be in the next major release.

Coming next major releases (not necessarily the next one):

- o Better low resolution handling.
- o Save & Load game features.
- o Better column move logic.
- o Better mouse handling
- o Your suggestions!

See README.WRI for registration information.
