

Terms, Conditions and Legal Dogma

The following are the conditions under which this software is sold, supported and may be used. There's nothing really nasty herein, but please read it carefully. By using this software, you are agreeing to these terms – even the bit about the leather-winged demon of the night.

Disclaimers

Neither the author(s) nor Alchemy Mindworks Inc. assume responsibility for any expense, damage or loss caused by your use of this software, however it comes down. If you can think of a way for a picture program to cause you damage or loss, you've a sneakier mind than any of us.

All the registered trademarks used herein are registered to whoever it is that owns them. This notification is given in lieu of any specific list of trademarks and their owners, which would not be as inclusive and would probably take a lot longer to type.

If you register software by Alchemy Mindworks, we will assume that you are doing so having tested the shareware version and ascertained that it's suitable for your hardware and requirements. We cannot provide refunds for shareware registration if you subsequently change your mind. Orders for registered software are filled immediately – once placed, they cannot be cancelled. This condition applies even if you have documented proof of extraterrestrials landing and beaming your computer back to their mother ship.

If you encounter bugs in this software after you register it, your remedy is to contact us and permit us to fix them. Nothing in the shareware versions of Alchemy Mindworks software is suppressed or crippled – if something isn't working as you think it should in the shareware, this will not change in the registered version (exclusive of bug fixes in later releases). Get in touch with us if you have any questions.

If your ordered software does not arrive within the specified time period indicated when you registered it, we will replace it. Non-delivery of ordered software does not constitute grounds for cancellation of your order. (If the post office loses it, we'll send you another one.)

If you register Alchemy Mindworks software and request that nothing be shipped to you, and that the shipping charges be waived, absolutely nothing will be shipped – not even a receipt. We cannot subsequently ship or FAX order confirmation or receipts for no-ship orders.

Note that registered users of Alchemy Mindworks software who have paid for updated software to be shipped will be shipped the current release version of the application in question, not a beta copy if one is extant.

Here's an important bit – as stated elsewhere in the documentation for this software, our order takers know less about software than most cats know about quantum mechanics. All they do is take orders. If you ask them questions about the software or our ordering or support policies anyway and subsequently get a wrong answer, Alchemy Mindworks will not be responsible for any consequences thereof, even if it turns out that they flat-out lied. Our technical support services will be happy to answer your questions – that's what they're here for.

No portion of the documentation for this software or any of its attendant files may be reproduced in whole or in part in any medium or form of transmission exclusive of the archive file for the software without the express written permission of Alchemy Mindworks Inc.

At Such Time as you Register...

Registering this software buys you a single-user license to use it in perpetuity, subject to the terms discussed herein. This means that your registered software can only be used by one person at a time, in the way that a book can only be read by one person at a time. You might, for example, have a copy on your computer at home and a copy on your computer at work. As long as you can't be at home and at work at the same time -- somewhat tricky unless your arms are unusually long -- and you have taken reasonable precautions to ensure that someone else will not use your the software on one machine while you're working with the other, your use of the registered software is in keeping with the license you have purchased.

A single-user license does not permit you to make the registered software available over a network for multiple users to access, to distribute it in any form or to provide it in conjunction with any other product without the express written permission of Alchemy Mindworks. If you have any questions about the software license, feel free to get in touch with us.

Note that this license extends only to the registered software itself, and in no way affects any files or documents you might create with it.

Credits

The FIF code, if present, was provided by Iterated Systems. See ITERATED.TXT for more information.

The JPEG reader in IFMT.DLL is based on code from the Independent JPEG Group.

Portions of the PNG code were written by Jean-loup Gailly and Mark Adler.

GIF is a trademark of CompuServe. LZW licenced under U.S. patent 4,558,302 and foreign counterparts.

GIF Construction Set, QuickShow, Multimedia Workshop for Windows, Pagan Daybook, Graphic Workshop, Desktop Paint, Image Gallery, GrafCat and GraphSaver are trademarks of Alchemy Mindworks Inc.

Shareware

If you have downloaded this software or had it given to you on disk to try out, we invite you to play with it for as long as you like to ascertain whether it's what you need. This shareware is not crippled, nor will it suddenly stop working after a predetermined period of time -- betas excepted. At such time as you feel it's useful enough to do productive work, we ask that you register it.

Note to GIF Construction Set users – using GIF files created by GIF Construction Set in your web pages constitutes productive work. If you don't think it's worth registering, please simply delete this software and any files you created while you were evaluating it.

Rumour has it that the leather-winged demon of the night trolls the web looking for GIF files that include unregistered GIF Construction Set comment blocks and rips the lungs out of their owners. Of course, this is just a rumour. We're not responsible for any loss, damage or bodily harm caused by demons, either.

A more convincing rumour has it that a spider program crawls the web searching for pages containing GIF files created with unregistered copies of GIF Construction Set. It then e-mails the owners of said pages about the problem. Note that if you create web pages for a third party and those pages contain graphics created with an unregistered copy of the software, the owner of the page might hear from our spider.

That's it...
