TrayColor

An indispensable utility for selecting and creating custom colors.   TrayColor displays the selected color's RGB values and converts the RGB values into the three standard formats, i.e. Hex, HTML and decimal

Features

Color Mixing

- Mix Red, Green and Blue values to create custom colors.

Grab Color

- Turns cursor to eyedropper, a color may then be selected by placing the eyedropper anywhere on the screen.

Color Palette

- Default windows color selection palette

Color Values

- Color described in Hexadecimal, HTML or Decimal format.

Copy Color

- Copy the described color value to the clipboard.

License Agreement

You should carefully read the following terms and conditions
before using this software.   Unless you have a different license
agreement signed by Proxy Systems Ltd. your use of this
software you indicates your acceptance of this license agreement
and warranty.

Registered Version

One registered copy of TrayColor may either be used by a single
person who uses the software personally on one or more computers,
or installed on a single workstation used nonsimultaneously by
multiple people, but not both.

You may access the registered version of TrayColor through a network,
provided that you have obtained individual licenses for the
software covering all workstations that will access the software
through the network.   For instance, if 8 different workstations
will access TrayColor on the network, each workstation must have its
own TrayColor license, regardless of whether they use TrayColor at
different times or concurrently.
