CCTask for Windows 95/NT

This little utility is designed to get you where no task manager has ever brought you before. Unlike many other task manager programs, this one has quite a few extra features, that we thought would be useful, that are normally not present in common manager utilities.

Some features may require additional explanation:

Basically, the interface is pretty simple. On the left you have the list of processes running, on top, and a list of files used, on the bottom. On the right, you have a bunch of buttons that do stuff.

Warning(s):
1) In order for most buttons to work, one of the processes has to be selected.
    2) Windows is a weird environment. Sometimes some things don't work.

Buttons that do stuff:

Hide / Show   - Hides the application off your mind and out of your face.

Caption   - Allows to change application's caption bar.

Minimize   - Minimizes almost any application.

Top / Bottom   - Brings application to top.

Kill / Destroy   - Guess.   Try to use Destroy though. Safer.

Sleep   - Closes an application after X minutes.

Allow Input   - Closes out all input to an application.

Priority   - Adjust priority to your liking.

Start / Stop   - Start and stop timed update for the program window.

Single   - Run an update for the program window.

About   - Just try it if you are clueless.

The check box AutoUpdate makes sure that the window is updated after any button is pressed.

Cron:

One of the most powerful features of CCTask is its CRON-style scheduler. It is unlike anything you've seen in windows. The basic idea is that you should be able to "schedule" anything anytime you want with the fewest number of lines. It closely resembles UNIX's cron (hence the name).

We went beyond the regular simplistic CRON feature of simply starting a program. You can use our cron feature to schedule start or "Kill" of a program. And system administrators might benefit from the log feature as well.

All you have to do is simply fill in the blanks, and hit the Save button. As long as the program is running at that time - it will happen.

Any time selection can be done using simple rules:

* - means all
1-4,9 - means 1,2,3,4,9 (including) do NOT use spaces!
Use 24 hours/day system for the Hour(s) line.

Just follow these and you'll be set.

Maybe you will like some of our *other* software….

To find out - go and check it out.

DISCLAMER

We offer no warranties of any kind on the above product. Use it at your own risk. Detail are in the license file attached.

_____

Registration:

You are free to use the software for a full month so that you can decide if you like it enough to buy it. If you do not, please remove it from your system.

Where does the money go?

1. All the money is going into support of the programmers involved in the development of this project. All so that we can write more software, knowing that our efforts are appreciated.

2. Into the infra-improvement of our company so that we can use the latest compilers, so that we can read the latest books and so that we can keep up with the hardware.

*What do **You** get out of it?*

3. For once, you get the satisfaction of owning the licensed product.

4. Then, you have the proud feeling of supporting the true shareware movement. On this point: we do not believe in crippleware (when the product stops functioning or is missing features just so that the user is forced to buy the program). Our software is fully functional, as all shareware should be.

5. You also get to get rid of that useless splash screen. ;)

6. We will notify you of new releases and features.

Group (or company-wide) registering is favored and therefore group discounts are available upon request. Please contact us through email for that.

BUT:

No matter if registered or not, we will still look at your comments and requests for features.

How much does CCTask Cost? $20.00

How do I register CCTask?

For Your convenience, we have **on-line registering**. Check out CCGrep home page for that feature.

Registering CCGrep with your **credit card**

7. You must have a valid Visa, Master Card, American Express, or Discover Card.

8. Go to our site HREF="http://www.cybercreek.com"MACROBUTTON

9. Browse to the CCGrep page

10. Click on the registration icon and follow the instructions.

11. We will process your order the same day.

You can register CCGrep with **Check** or **Money Order**.

Just Print this form and drop it in your envelop.
