

PREFACE

About This Manual

This comprehensive user manual provides detailed information as well as procedures for using Backup Exec for Windows NT Server (Backup Exec). The manual is organized into chapters, beginning with the basics and moving on to more advanced topics.

Before using this software, you should have a working knowledge of the computer and its operating conventions. If you need to review these techniques, refer to the documentation that came with your computer.

Conventions

Numbered lists (1., 2., _) indicate step-by-step instructions. These steps must be executed in the order presented.

Text that you are required to type on the keyboard is shown in a lowercase font similar to what you would see on your screen. The text to be typed is preceded by the word Type and followed by the key(s) to press:

Example: _____ Type: a:setup and press <Enter>.

Note: If you are using a mouse, the following terms are used:

Click	Press the mouse button once.
Double-click	Press the mouse button twice (quickly).
Check/Uncheck	Click on the check box or press <Spacebar>.

Key strokes appear in angle brackets (< >).

Example: _____ <Enter>

Key stroke combinations appear in one set of angle brackets and are joined by a plus sign (+).

Example: _____ <Shift + F1>
